

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

The members elect were called to order at 11 o'clock A. M., by Edward M. Johnson, Clerk of the last Assembly.

The Hon. John Bigelow, Secretary of State, administered to the members present the oath of office, prescribed by section one of article twelve of the Constitution of this State, and said oath was thereupon subscribed by the members.

Mr. Hogeboom offered for the consideration of the House a resolution, in the words following:

Resolved, That this House do now proceed to the election of Speaker; that the roll of members be called by the Clerk, and that each member, as his name is called, rise in his place and openly name his choice for such office, and after the election of Speaker shall have been determined, we proceed to the election of Clerk and Sergeant-at-Arms, in the same manner.

The Clerk put the question whether the House would agree to said resolution, and it was determined in the affirmative.

The House then proceeded to the election of Speaker.

George B. Sloan having received a majority of all the votes given, the Clerk declared he was duly elected Speaker of the Assembly.

The Clerk appointed Messrs. Husted and Cozans to conduct the Speaker elect to the chair. On taking the chair he addressed the House as follows:

Gentlemen of the Assembly: I am deeply sensible of the honor conferred upon me by the vote just announced, which designates me as your presiding officer. While offering you my grateful acknowledgments for this expression of your confidence, I may well observe that you have honored me not only beyond my deserts, but beyond any aspirations I have ever felt at liberty to entertain; and, I may also add that when I call to mind the delicate and oftentimes trying duties of this position, and the signal ability displayed in the same relation by my immediate predecessor, as well as by other gentlemen whose accomplishments have graced the office on former occasions, it is not easy to escape a sense of oppression which burdens me even now, as I enter upon the task you have given me to perform.

I might well shrink from assuming these responsibilities, were I not encouraged by circumstances which lead me to attempt their fulfillment.

I recognize many members of this body largely experienced in public affairs, among whom are not only gentlemen who have served with distinction in this branch of the Legislature, but those whose names are honorably written on the journal of the Senate as well; and to such I believe I may confidently turn for that advice and counsel of which I shall so often stand in need.

Others there are of whom it may be said, though yet untried in the work of legislation, they are nevertheless strong in the knowledge of practical affairs, who are ready and willing to join their efforts in producing those salutary results which I have reason to think are desired by every member of this House; and persuaded as I am that all are animated by a common purpose to uphold the honor and integrity of the State, I anticipate such wise and judicious action as shall occasion no feeling of regret that we have had a part in its accomplishment.

We meet at a time of unusual solicitude and interest — a time when public attention is anxiously directed to the extraordinary circumstances attending the late presidential election. Differing opinions as to the methods to be employed in solving the question are entertained by gentlemen of distinction in the two political organizations, and it may naturally be supposed that these opinions are influenced to greater or less extent by the predilections of the individuals themselves.

But however this may be, so pronounced is the determination of the people for a just and peaceful settlement of the matters in controversy, that violent or unconciliatory counsels are regarded by thoughtful and right minded men of either party as little less than vagaries not worthy of serious consideration. It may therefore be assumed, that patriotic effort, united with calm deliberation, having the support of an assuring public sentiment, looking to the welfare of the country as above and beyond all partisan considerations, will be found effectual in arriving at such results under the Constitution, as shall allay existing irritations, and be acquiesced in by the people generally, as just and equitable to all parties concerned.

Turning from the broader field of national affairs, to glance at what may be regarded more legitimately within the province of our own duty, we find promise of being able to answer the reasonable expectations of the people. The desire evinced in all parts of the State for rigid economy in every department of the public service, is one likely to overshadow demands that might otherwise be made upon us. It is, therefore, a satisfaction to know that the present condition of the finances, and the diminished public debt, are elements exceedingly favorable in adjusting

the rate of taxation to correspond with the prevailing depression in all departments of commercial and industrial pursuits. So far reduced are the financial obligations of the State that the requirements for the payment of principal and interest are comparatively trifling. We have, therefore, only to exercise moderate prudence in appropriating for the other purposes of government to render the burden of taxation so light as to be in no degree oppressive.

It will be a part of your duty to consider the question of reapportioning the Senate and Assembly districts of the State, in conformity to the provision of the Constitution, which demands such supplemental action after each enumeration of the inhabitants is made.

Another subject of moment will also engage your attention in the form of legislation required to give effect to the amendments to the Constitution, approved by two previous Legislatures and ratified by the people at the last election. I refer to the amendments changing the system of management of the canals and the State prisons. It is not necessary for me to urge the desirability of early and painstaking consideration of these measures, since you fully understand and appreciate their importance; but may I not in this connection take the liberty of suggesting the great advantage to be gained by promptly acting on *all* matters that may be brought to your attention?

Close and earnest application by the various committees of the House to the work in hand during the early part of the session, will render practicable that necessary attention to measures which, under other circumstances, are apt to be imperfectly prepared and much too hastily enacted.

By early action in the direction indicated, it may also be assumed that bills of doubtful utility will be more likely to be defeated than if allowed to linger on your files, until the hurry of the closing days of the session shall lend facility to their passage.

Other suggestions might be made did I deem them needful, but I believe my duty in that regard is already more than discharged. Your intelligence, your experience, and your full understanding of the requirements of the situation, afford in themselves the amplest guarantees that all will be wisely done. It only remains for me, therefore, to give assurance of my desire to co-operate with you in every practicable manner, to secure the best results in whatever we may undertake as members of this body, and to further add that, however conspicuous may be my faults as your presiding officer, the fault of intentional injustice to any member on this floor will not be found among them.

The House in like manner then proceeded to the election of Clerk of the Assembly, with the following result:

FOR EDWARD M. JOHNSON.

STATE OF NEW YORK, }
EXECUTIVE CHAMBER, *January 2, 1877.* }

To the Legislature:

At the commencement of my service as chief magistrate of the State, it is gratifying to find the legislative representatives of the people assembled in their respective chambers and ready to unite with me in such measures as the welfare of our constituents may demand. In entering upon our duties it becomes us to acknowledge our dependence upon the Supreme Power which controls the destinies of States and nations, and which has so often interposed for our deliverance from danger, and humbly to implore a continuance of its guidance and protection.

We ought also at all times to remember that we are not here to promote our own individual interests. The people have not chosen us and sent us to their Capitol for any such purpose. On the contrary, they have placed in our hands a great and sacred trust, to be administered for their benefit and for the interest and honor of the inhabitants of the whole State, without regard to locality, religious creed or political party. The money which they pay into the public treasury is not our money; nor is it the money of the State, except as the people are the State. It still belongs to them until it is paid out by their agents for the legitimate expenses of their government as provided by the Constitution and laws. If a single dollar be otherwise appropriated or paid, it will be a breach of trust for which there can be no justification or excuse. Let us keep these principles constantly before us as we proceed with our respective duties.

FINANCES.

The accounts of the financial affairs of the State are kept with thirteen different funds, counting the several canal funds as one. The details of the accounts will be found in the Comptroller's report. The following statement exhibits the financial condition of the State at the close of the fiscal year, as it would be if all the funds were condensed into one:

Aggregate balance in the treasury of all the funds, October 1, 1875,	\$8,126,778 98
Aggregate receipts during the fiscal year ending September 30, 1876.....	18,623,986 29
Total.....	\$26,750,765 27
Deduct payments during the year	17,827,711 49
Balance in the treasury September 30, 1876.....	<u>\$8,923,053 78</u>

A large proportion of the above balances in the treasury consist of money in the various sinking funds.

The amount of receipts into the treasury on account of the General Fund revenue during the year ending September 30, 1876, was...	\$11,646,517 63
The payments, including the deficiency of \$783,863.77 on the 1st of October, 1875, and also \$4,640,849, transferred to the Bounty Debt Sinking Fund, were.....	11,644,982 98
Balance September 30, 1876.....	<u>\$1,584 65</u>

The balance, although small, is more satisfactory than the large deficits which have almost uniformly appeared for many years past.

DEBT.

On the 30th of September, 1875, the total funded debt was \$28,328,686.40, classified as follows:

General Fund.....	\$3,119,526 40
Contingent	68,000 00
Canal	10,086,660 00
Bounty.....	15,054,500 00
	<u>\$28,328,686 40</u>

On the 30th of September, 1876, the total funded debt was \$23,315,898.58, classified as follows:

General Fund.....	\$3,092,288 58
Contingent	5,000 00
Canal	10,081,660 00
Bounty.....	10,137,000 00
	<u>\$23,315,898 58</u>

Actual reduction of the debt during the year by cancellation..	<u>\$5,012,787 82</u>
Aggregate amount of debt.....	\$23,315,898 58
Deduct money and securities in the sinking funds.....	14,191,889 50
Total amount of debt after applying sinking funds	<u>\$9,124,009 08</u>

The bounty debt will mature on the seventh day of April next. The sinking fund, together with the one-third mill tax, now in course of collection, will be sufficient for its full payment.

The balances in the sinking funds on the 30th September, 1876, including money and securities, were as follows:

General Fund.....	\$2,910,529 36
Canal	2,121,050 24
Bounty.....	9,160,309 90
Total.....	<u>\$14,191,889 50</u>

It must be observed, however, that the amount in the General Fund Debt Sinking Fund cannot all be applied to the payment of that debt, without leaving a large deficiency of means for paying the current expenses of the government. The full amount required for the payment of the debt was contributed from the surplus revenues of the canals, as directed by the Constitution, the last contribution having been received in 1873. But instead of being applied to that object, it was used to pay other appropriations made by the Legislature, and not otherwise provided for, and has never been fully restored. The debt, therefore, remains uncanceled, and, if ever paid, it must, to a large extent, be paid by taxation. The whole of it—except \$800,000, due in 1878, and

\$30,443.76, due on demand — is payable at pleasure, and is held by the State as an investment for the various trust funds. In this condition it will of course remain, the interest upon it being paid to the respective funds for which it is held, so long as the Legislature may choose to leave it in that shape. It would be more satisfactory, and in better accord with the Constitution, to have the whole debt extinguished, and the money belonging to the trust funds invested in other securities. It is believed that the \$800,000 due in 1878 may be paid from the sinking fund without taxation.

CANALS.

The report of the Auditor of the Canal Department exhibits in detail the operations, revenues, debts and expenses of all the canals. It will be unnecessary to present here any thing more than a few of the leading and important facts.

The gross amount of income from tolls and other sources for the year ending 30th September, 1876, was \$1,487,332.89, being \$438,662.74 less than in the preceding year. The cost of collection, ordinary repairs and other charges on revenues amounted to \$1,149,194.61, being \$318,121.34 less than in the preceding year. The Erie canal produced a surplus of revenue over expenses amounting to \$508,953.14. The other canals all show small incomes and large deficiencies of revenue as follows:

	Gross income.	Deficiencies.
Champlain.....	\$94,944 55	\$83,667 51
Oswego	29,048 35	27,175 17
Cayuga and Seneca.....	11,083 99	14,312 34
Chemung.....	2,104 84	7,689 87
Chenango	3,717 88	4,602 03
Black River.....	11,339 28	23,734 85
Genesee Valley.....	14,668 50	8,595 60
Crooked Lake.....	30 48	1,562 41

The year has been one of unprecedented disaster to the boatmen and to all others engaged in the navigation of the canals. In addition to the great depression in every branch of business, there has been an extraordinary competition between the railway lines extending from the Western States to tide-water, which has diverted trade from the canals, and notwithstanding the very low rates of toll, there has been a large falling off in tonnage as well as revenues. Many boats have been laid up; others have been run at a heavy loss and none of them appear to have made any profits.

The effective measures of reform which have been enforced within the last two years, arresting mismanagement and fraud and reducing expenses, have saved the canals from total ruin. Small as the income is, the expenses have been reduced below it, and yet the canals have been kept in complete repair during the entire season. Their future success, if they are to have any, must depend upon a faithful perseverance in this policy.

The question of high or low tolls in the present condition and prospects of canal transportation is one about which there would seem to be no ground for any difference of opinion. Under the Constitution, as now amended, no more money can be expended on the canals in any one year than the gross amount of their revenues for the preceding year. It is, therefore, indispensable for the forwarders to pay such tolls as are required to keep the canals in running order; and no one can reasonably ask them to pay any more, when they are making losses instead of

profits on every cargo which they carry. It is true the Constitution requires the canal debt to be provided for from the surplus canal revenues, but no law can enforce impossibilities.

It is to be hoped that the depression in trade will not be of long continuance, and that prosperity may soon return to the canals. It is believed that the railways cannot continue permanently their unreasonable competition without involving themselves in ruin. When such a change shall take place that forwarders can again realize a fair income from their business, they will, of course, be required to pay such tolls as will provide for the canal debt. Until that time it must inevitably be a charge upon the tax-payers of the State. With the usual amount of freight, at fair prices, the present rates of toll will doubtless be sufficient for all purposes, and with continued economy in expenses, they may probably be still further reduced. Since the close of navigation the railway companies have agreed upon an increase of freights; but the past history of such agreements leaves it uncertain whether this one will be of long duration.

It is perhaps unnecessary to add that any expenditures, under present circumstances, for enlargements or extraordinary repairs, should not receive encouragement from any source.

Those who have suffered most severely by the loss of business upon the canals are the boatmen, and although it may not be in the power of the Legislature to relieve them, it is impossible to withhold from them our sympathy. The number of their boats is about 6,000. They are in one sense the partners of the State. They do the work which produces the revenue to keep the canals in repair. Their labor is severe, and their exposure great. In many instances their families live upon the boats, in order to reduce their expenses to the lowest point. No part of the plunder which others have received has ever gone to them; on the contrary, they have suffered from it by paying tolls which have been misapplied. But with all their labor and economy they have been unable during the past season to pay expenses. If any relief can be extended to them in the present depressed condition of trade, it must come from a further saving in the cost of maintaining the canals, and a consequent further reduction in tolls. Even this will not probably be sufficient to carry them safely through another season of such competition as they have encountered during the last year.

THE LATERAL CANALS.

Whether any further appropriations should be made on account of such lateral canals as the Legislature has a right to dispose of, can be best determined after receiving the report of the commissioners appointed by an act of the last session, to examine that subject. It will be seen by the results of the year's business given above, that those canals are rapidly disposing of themselves, and have already become of little value, even to the people living near them.

I learn from the commissioners that they have made the inspection and examination required by the act appointing them, and will soon be prepared to report. The act fixed their compensation, and directed its payment, together with their expenses, but made no appropriation, and they have not been paid. The necessary appropriation should be made.

STATE PRISONS.

The State prisons have kept on their way from bad to worse. The

number of convicts in the three prisons September 30, 1876, was as follows :

Auburn	1,281
Clinton	623
Sing Sing	1,605
Total	8,509

The excess of advances from the treasury over receipts from earnings was \$704,379.85. This deficiency is larger by more than \$100,000 than was ever before known. It is due to the present inspectors to state that they claim the increased deficiency to be largely owing to incumbrances which fell upon them from their predecessors.

A commission was appointed by an act of the Legislature of 1876 to make a thorough investigation of the affairs of the prisons. The commissioners have been actively engaged in the service during the whole summer and autumn. Their report will very soon be submitted to the Legislature, and will, I presume, cover the whole ground of prison management, discipline and maintenance. I commend it to the attention of the Legislature, without further comment at this time.

STATE REFORMATORY AT ELMIRA.

It is gratifying to be able to announce to the Legislature that a large portion of the Reformatory building has been finished and brought into use. With a reasonable appropriation, the entire structure will be completed within the present year. The board of managers, appointed by chapter 207, Laws of 1876, organized in accordance with the act, and succeeded in securing the services of a very competent and efficient superintendent. Having completed and furnished the south wing, they received 170 convicts from the Auburn and Sing Sing prisons, who were immediately put at work upon the north wing, the prison wall and workshops, which have been advanced rapidly towards completion. The superintendent estimates that with an appropriation of \$185,000, and with the privilege of using the prisoners without the interference of contractors, he can fully complete and furnish and bring into use all the buildings, including the prison wall, within the year, and support 300 convicts during the progress of the work, and that then, with possibly a small appropriation for maintenance in 1878, the Reformatory will cease to be a burden upon the State treasury. He is confident that it can be made entirely self-sustaining.

In 1874, the Governor in his annual message estimated the whole cost of the buildings at \$2,000,000. Assuming the above estimate of the superintendent to be correct, they will be completed for a little more than one-half of that sum. But for the ambitious style of architecture adopted at the outset, the cost would have been much less than \$1,000,000.

The design of the Reformatory was the reformation, as well as punishment, of young convicts who had not become hardened in crime. With this object in view it was originally enacted that no convicts should be sentenced to it except such as were over sixteen and under thirty years of age, and convicted of a first offense. It is a source of much regret to the friends of the institution that it should have been, even temporarily, diverted from its original purpose; but the crowded condition of the other prisons, and the necessity of relieving them as far and as speedily as possible, led to the use, for the time being, of the Reformatory for that purpose.

The managers will require some further legislation to aid them in the discharge of their duties, and to promote the objects of the institution. Their views and recommendations will in due time be laid before you.

CONSTITUTIONAL AMENDMENTS.

The people of the State, at the last election, adopted by an immense majority, the constitutional amendments which had been approved by two previous Legislatures, and which have thus become a part of the Constitution of the State. They provide for the appointment, by the Governor and Senate, of a Superintendent of State Prisons, with all the powers of the Board of Inspectors, and a Superintendent of Public Works, with all the powers of the Canal Commissioners. A radical change is thus made in the management both of the prisons and of the canals. In each case all power and responsibility are placed in the hands of one controlling executive officer.

Wearied with the frauds, the wasteful and extravagant expenditures which so often attend the management of irresponsible boards, the people have determined to make this great change, with the hope of better results. They undoubtedly desire that the amendments be carried into effect as speedily as possible. I recommend, therefore, that an act be passed with as little delay as may be proper, fixing salaries of the respective Superintendents, and also the amount of security to be given by each.

A brief act containing these simple provisions will be all that will be necessary before appointing the Superintendents, and enabling them to enter upon their important duties. If further legislation should then be found desirable, either in regard to the canals or the prisons, it could be perfected at the convenience of the Legislature, and with ample time for deliberation.

PUBLIC BUILDINGS.

One phase of the extravagance and folly, amounting almost to lunacy, caused by an inflated currency and inflated modes of life, developed itself in a passion for costly public buildings. Of these the New Capitol takes the lead. Its cost was originally estimated at \$4,500,000. There have already been expended upon it over \$7,500,000, and it will undoubtedly require as much more to complete it; and when completed it will be a vast pile of ornamental stone work, not at all in keeping with the tastes and good sense of plain, substantial people. In addition to this, it is discouraging to contemplate its completion in view of the enormous annual cost of heating, lighting, cleaning and superintending it.

Following in the wake of the Capitol are several Insane Asylums, the State Reformatory, houses for Normal Schools, High Schools and other buildings upon which millions of the people's money have been wasted in useless ornaments and luxurious arrangements. In behalf of those which are not yet completed — embracing nearly all of the most costly structures — the usual representation is made that unless we go forward and spend the further amounts required for their completion, we shall lose all that we have expended. Whatever force there may be in this argument, I confess that in the present condition of financial affairs, the actual distress caused in many homes by the payment of their heavy taxes, I should prefer to have the expenditures cease, the tax-payers relieved and the buildings left as they are, at least, until the advent of better times. Fully responding to the demands of humanity in behalf

of the unfortunate poor, I cannot see the propriety or the justice of reducing a large body of taxpayers to pauperism for the purpose of building gorgeous palaces in which other paupers are to be supported at the public expense.

STATE BOARD OF HEALTH.

Several medical gentlemen of great eminence in their profession have asked my attention to the subject of a State board of health. They believe that such an institution would render essential service in the prevention of sickness and the preservation of life and health. They claim that, in almost every case where local epidemics have prevailed with a severity and fatality which seemed mysterious, their origin can be traced to some neglect of sanitary precautions or to some cause which a properly organized board of health would have discovered and removed. Important as this subject is, it has been impossible for me to find time for such an examination of it as would justify any specific recommendations. I can only ask your careful consideration of it. I do this the more willingly because I am assured that it is not intended that any expense shall be incurred by the State beyond a moderate salary for the secretary of the proposed board.

COMMISSIONERS OF EMIGRATION.

The condition of the affairs of the Commission of Emigration is embarrassing, and demands prompt consideration. The commission is charged with the duty of watching over all emigrants landed in the city of New York, on their arrival; and, in the cases of any who fall into distress, for some years afterwards.

Heretofore, under authority of the laws of this State, bonds have been required with conditions to indemnify the cities, counties and towns of the State against these passengers becoming a public charge upon them. The practice has been to accept, in lieu of the bond, a certain sum in cash from each passenger, which money constituted the revenue or fund of the commission, out of which it has reimbursed the several counties for any expenditures made in support of distressed emigrants within the period named. This revenue is now entirely cut off by a decision of the Supreme Court of the United States, declaring all such laws unconstitutional. The decision was rendered on the 21st of March, 1876, since which date no commutations have been paid nor bonds given.

Out of the moneys heretofore collected by the Commissioners of Emigration, as agents of the State, the public faith is pledged to provide for all emigrants — in behalf of whom contributions to the fund were made — who may need assistance within five years from the date of their arrival.

There are 120 acres of land on Ward's island upon which were erected hospitals, a refuge, an asylum for insane persons and other buildings, for the use of the commission. The lands were bought and the buildings erected out of the commutation moneys. The title to the property is in the State. The commission estimates its value at \$2,000,000. It is subject to a mortgage of \$200,000.

The Legislature last year, on the recommendation of the Governor, appropriated \$200,000 toward the current expenses from May 1, 1876, to May 1, 1877. Of this there had been expended, up to the third of November last, \$109,000.

I learn by a communication from the president of the commission, dated December 13, 1876, that the number of passengers from foreign

ports landed at New York from January 1, 1876, to the above mentioned date, was 109,592. That of these the number which came under the immediate care of the board was 72,326. The number admitted during the same period to the refuge and hospital was 3,953, of which number 687 remained in the institutions—331 being sick in the hospital, 141 insane in the lunatic asylum, 162 crippled or otherwise disabled in the refuge, and fifty-three children in the nursery.

It seems necessary that some provision be made by which the public faith may be kept with the emigrants—at least until the relief which is sought through a bill pending in Congress is obtained. The importance of the question as to how we are to deal with emigrants is shown by the fact that out of a little more than 8,000,000 reported as arriving since May, 1847, nearly 6,000,000 were landed at New York. Further details will be found in the annual report of the commission.

SAVINGS BANKS.

Recent disasters among our savings banks admonish us of the necessity of rigid restraints against mismanagement. These institutions are created for a special purpose, to wit, to take charge of small savings; the saving of those who handle little money, are inexperienced in investments, and to whom the loss of any part of their limited capital is a serious calamity. Every thing practicable should be done toward absolute security, and the money deposited by this class of persons should never be mixed up with that of others who handle large sums, and are capable of taking care of it for themselves, nor should it be subjected to the risks which persons of greater means and large experience are accustomed to take.

I recommend a re-examination of the general law passed in 1875, regulating these institutions. Section 34 of that act provides, that for the purpose of ascertaining the surplus held by a savings bank, its interest-paying stocks and bonds shall be estimated at their market value. I suggest instead, that such investments shall not be estimated above cost, nor above par, nor above market value. Any advance in cost is unrealized profit until the stocks are sold; and it may never be realized. If a premium above par has been paid, or is indicated by the current market value, this is sure to disappear if the stocks or bonds are held till maturity; it should not be counted as an asset, except when the bonds have been sold before maturity, and the premium is actually on hand.

I suggest, also, that the privilege, granted by section 27, of leaving ten per cent of the aggregate deposits, and also the current cash daily balances, of savings banks; with an ordinary bank or trust company should be taken away. This is mingling the money of the poor with that of the more speculative and more watchful classes, and subjecting it to the same risks. It is inconsistent with the provision of section 30, which forbids a saving bank lending any part of its funds upon notes, bills of exchange, drafts, or any other personal securities whatever. For such is the very class of securities on which the ordinary business bank will risk the money of the savings bank, in common with that of its other customers. It is, no doubt, desirable that a certain portion of the means of a savings bank should be in such shape that it can be promptly realized; sufficient provision to this end is otherwise made by the same section 27, which now authorizes temporary loans directly by the savings bank itself, upon certain classes of stocks and bonds. I see no reason why a savings bank should not keep its cash means as other banks do, in its own custody, in its own vaults.

An aggregate amount of deposits is now allowed to be made by one person, up to \$5,000. I suggest that it be reduced to \$1,000, or at most \$2,000; and this inclusive of accumulated interest. Persons of considerable means now put money into a savings bank in order to get better interest than elsewhere. The institutions are not meant for this class. The possession of considerable means implies the capacity to take care of money. Nor do I approve of the provision of section 22, allowing deposits to be received from corporations and societies. Every association must necessarily have a business head, capable of taking proper care of its funds. An association of any kind does not need the aid of a savings bank.

Section 23 implies that savings banks may properly receive deposits of money paid into court or under the order of a surrogate. A separate class of institutions—trust companies—have been provided for this special purpose, and such deposits are, for the most part, in large sums. All the creditors of a savings bank ought to be of the same class, to wit, creditors for small sums. I am inclined to the opinion that the disasters among our savings banks are due, to some extent at least, to their having sought, of late years, after a class of business which formerly they never undertook, and for which they are not intended.

Section 33 provides that dividends may be made of not exceeding six per cent per annum. This limit, I think, should be reduced to five per cent. High interest and increased risk always go together. Government bonds pay now only four and a-half per cent per annum, and savings banks ought not to be tempted, by efforts to pay high interest, into dealing into any but the very safest securities.

Section 33 requires every savings bank, when it has acquired a surplus of ten per cent, to divide all accumulations beyond that. I submit that ten per cent is not sufficient guarantee against losses. In view of the great and sudden depreciation to which property of all kinds is sometimes liable, as we know by present experience, I am not sure that any limit should be put upon the accumulation of a surplus fund. Such a fund had better be too large than too small. It seems to me that the limit of ten per cent is, at all events, much too low. These suggestions are respectfully submitted to your consideration. The purpose I have in view is, that this class of institutions, so valuable to the welfare of the great mass of the community, shall be rigidly confined to the duty for which they were created. They are semi-charitable in their nature, and their aid should not be given to nor their benefits shared by those who need no help.

Number of volumes in school district libraries.....	804,802
Number of persons in the State between the ages of five and twenty-one years.....	1,585,601

The foregoing statements should attract attention. Previous to the year 1856, the State appropriated \$800,000 per year for the support of the common schools. The act of 1856 changed the practice by levying a three-quarter mill tax, which produced a little over \$1,000,000 per year, until 1867, when the rate was raised to one and one-quarter mills, which produced over \$2,000,000, and in consequence of the recent extraordinary increase of valuations, it now produces over \$3,000,000, and for the next fiscal year it will be probably \$3,500,000. Adding to this the amount raised by local taxation, for the same object, we have a grand total of over \$12,000,000.

The amount paid for teachers' wages during the past year was \$7,949,085.17. The whole number of children attending public schools was 1,067,199. The number attending normal schools, 6,391. The number of children of school age in private schools, 134,404. If to all these we add the numbers of those who are instructed at home by private tutors, in academies, colleges and other institutions, not reported, some idea may be formed of the immense amount of money drawn from the people of the State, voluntarily or by taxation, for school purposes. Without intending to intimate the least suspicion that any part of this large amount is unwisely or improperly expended, the subject is of such magnitude as to be worthy of careful examination and scrutiny.

The question whether the State can educate all the children within its limits better than they can be educated in schools organized, conducted and paid for by the parents of the children themselves, has been decided in favor of the State, which is now conducting the experiment on a very large and expensive scale. It is of the utmost importance that the experiment should be successful, and that it should be so conducted as to merit the confidence and support of the entire community. To this end, if there are any errors in the mode of conducting it, they should be corrected before they lead to evils which it may be difficult, if not impossible to remedy.

The only ground upon which citizens who have no children can justly be compelled to pay taxes for the education of the children of others is, that it is necessary for the safety of the whole people, under our form of government. Our institutions, by their very theory, carry with them the assumption of a certain grade of intelligence among the citizens. It seems, therefore, to be the duty of a State to see to it that each and every citizen, so far as practicable, shall be educated to such a degree as will enable him to read and understand the laws, the Constitution and the ballot that he votes on election day. The schools in which education is given to this extent always carry their line of instruction far enough to embrace all the branches usually taught in our common schools. It seems to me to be a clear violation of personal rights for the State to go beyond this and levy taxes to support free academies, high schools and colleges, in which the higher branches of literature and science are taught, and young men prepared for the learned professions. This should be left to individual effort, from which better results always come than from any amount of donations from the State.

It should also be remembered that the expenditure of such large amounts of public money has almost invariably led to great abuses, and there is no security against the same tendency in educational management. The expenditures for school-houses, repairs and furniture, during the last ten years, have amounted to \$19,569,109.97. It is, perhaps, well to inquire whether this large amount has been wisely expended, in

the construction of plain, substantial and comfortable school-houses, or whether it has been, to any extent, handled by fraudulent contractors, or devoted to the construction of costly and ornamental buildings for the benefit, possibly, of the owners of adjoining property.

I would also suggest an inquiry as to whether the normal schools are really worth to the system what they cost. I am informed that a very large portion of the pupils instructed in them never follow the profession of teaching for any length of time.

There ought, also, to be found some remedy for the great abuse and expense arising from the number of new school books, and the frequent changes made, for no good purpose but simply to benefit the publishers and agents. It is undoubtedly true that inducements are frequently offered to school authorities and teachers to aid in the work of changing books and selling new ones. It would be strange if these temptations were always resisted. It seems to me proper that the Legislature should fix some limit to this evil.

Finally, I would recommend a return to the former system of making an appropriation of a specific sum in each year from the State treasury for the benefit of the common schools, and put into the tax levy a rate sufficient to cover the amount — \$2,500,000 at the utmost ought to be, and will be, amply sufficient, if proper care is taken in the use of it. These suggestions are made in a spirit of sincere friendship to our common school system, to the end that it may not be exposed to any just objection; that its administration may be characterized by a wise economy, and by a degree of purity which shall place it above suspicion, and keep it in the future as it now is, strongly intrenched in the confidence of the people.

COLLEGES AND ACADEMIES.

The annual report of the Regents of the University, soon to be communicated to the Legislature, will fully exhibit the condition of the colleges and academies of the State. Notwithstanding the stringency of the times the aggregate attendance in the colleges is somewhat greater, and but little less in the academies, than during former years. Some institutions of either class are adequately endowed, and others are making vigorous efforts to secure such an amount of productive funds as will place them on a secure financial basis.

THE STATE LIBRARY AND MUSEUM OF NATURAL HISTORY.

The Regents of the University, as trustees of the State Library and State Museum of Natural History, will report their condition, in detail, at an early day. Valuable additions to both have been made during the past year, the library having increased to more than 100,000 volumes. In the departments of law and American history it is unsurpassed by any other State library of the Union.

THE NATIONAL GUARD.

From the report of the Adjutant-General, as well as from my own limited observation, I learn that the condition of the National Guard is entirely satisfactory. The appropriations made for its support and improvement have been carefully and judiciously expended. The organization, spirit and discipline of the officers and men were never better. The improvements in rifle practice, to which special attention has been given during the past year, have been of a very gratifying character, and will be continued. At a comparatively small annual cost the National

Guard is kept in such a condition of organization and discipline as to constitute a nucleus around which a large force could, if necessary, be gathered and made effective in a very short time.

At the present time the National Guard consists of eight divisions, eighteen brigades, one regiment and eleven separate troops of cavalry; one battalion and eleven separate batteries of artillery; twenty-five regiments, twelve battalions and eighteen separate companies of infantry — in all comprising 1,546 commissioned officers and 19,878 non-commissioned officers, musicians and privates, making an aggregate force of 21,424, showing an increase of 2,011 over the aggregate of last year.

REDUCTION, OF TAXES.

In 1873 the State tax was.....	\$14,800,903 38
In 1874 the State tax was.....	15,727,482 08
In 1875 the State tax was.....	14,206,680 61
In 1876 the State tax was.....	8,529,174 32

The large reduction of taxes for State purposes, shown by the above statement, is due in some measure to the reduced amount required for the bounty debt, but mainly to the stopping of expenditures for new works and extraordinary repairs upon the canals, and to the other reforms and economies which have been inaugurated and enforced during the last two years. By a rigid adherence to this policy the taxes may be still further reduced during the present year. Unless the people permit a renewal of the wasteful expenditures of former years, they will hereafter have no cause to complain of the amount of State taxes. The load which oppresses them most heavily will be found at their own doors in their town, county and city taxes. When they have the courage to look these in the face, and insist upon their reduction within reasonable limits, they will obtain the full measure of relief to which they are entitled.

The rate of taxation for the current fiscal year was fixed by the Legislature at its last session at three and eleven-twenty-fourths mills. For the next fiscal year it is estimated that two and three-quarter mills will be sufficient. But this estimate is based upon the assumption that the Legislature will decline to make appropriations which are not required for the legitimate expenses of government.

INCREASED VALUATIONS.

The State Assessors inform me that there will be a very large increase in the valuations, especially in the agricultural districts, carrying the total valuations for the whole State up to the probable amount of about \$2,800,000,000. This extraordinary increase is of doubtful propriety. It seems to be an effort to follow upward the unnatural prices caused by the currency inflation, at a time when the inflation has produced its inevitable disasters, and when prices are rapidly falling nearer to actual values. The effect of the increase is to render it uncertain what amount any specified rate will produce. Instead, therefore, of levying specific rates for particular objects, which may produce too much or too little, it would be better to appropriate the amounts required, and fix a rate sufficient to cover them, so that, if there be a surplus, it shall remain in the treasury.

The efforts of the assessors should be not so much to increase valuations as to produce a just and equitable distribution of the burdens of taxation among the people. When this point is gained it is of little importance whether the valuations are above or below what are called actual values. For many obvious reasons it would be better that they should be below rather than above. The true value of property is rarely

known. It is not a matter of fact, but of opinion. Hence it is always estimated, and the tendency usually is to estimate too high.

EXEMPTING CHURCHES, ETC.

It is proper to refer in this connection to propositions which are sometimes made to increase the valuation by changing the policy which has always prevailed in this State of exempting churches, schools and hospitals from taxation. I cannot too strongly express my disapproval of any such change. Our people of all classes and all creeds have surrounded themselves with these institutions of civilization which are foremost in the influences that diminish the expense of government by lessening the infractions of law. They should not be discouraged by the imposition of burdens from which they have hitherto been exempt.

SURPLUS OF THE BANKS.

Taxing the whole surplus of the banks in addition to their capital is neither equal justice nor sound policy. Besides compelling them to pay more than their fair proportion, it induces them to divide their surplus among the stockholders, thereby diminishing the security which it gives to the public so long as it is held by the banks. In times like the present the exigencies of every day may diminish both surplus and security. The subject is submitted to your careful consideration and wise discretion.

LEGISLATION IN APPROPRIATION BILLS.

A very objectionable practice has grown up of inserting general legislation in appropriation bills. The effect of it is to conceal legislative provisions in places where they ought not to be and where the public generally do not think of looking for them. It also puts it beyond the power of the Governor to withhold his approval from such provisions unless he vetoes the whole appropriation bill in which they are contained. I trust that the practice will be discontinued altogether, and that the question may not be presented as to whether such provisions shall become law, or whether the appropriation bills containing them shall be returned disapproved.

THE STATE SURVEY.

Several instances of the pernicious mode of legislating above referred to will be found in the "supply bill" passed at the last session. The most conspicuous among them is the provision for instituting and organizing "an accurate trigonometric and topographical survey of the State." Without any application by the people, with no appreciable evil to remedy, with no practical inconvenience in the experience of a hundred years, and at a period of great pecuniary embarrassment, a plan is enacted in an appropriation bill for embarking the State, against the wishes of its people, in a work which promises to run through half a century, and to cost an unlimited amount of money. The mode and the matter of the enactment are alike objectionable, and I recommend the prompt repeal of that portion of the supply bill.

THE CURRENCY.

The vast agricultural, manufacturing, commercial and financial interests of the State make a sound and stable currency a matter of the highest importance. It is, however, of little use to enter into any extended discussion of the subject here. The country has been deluged with essays in regard to it, and all intelligent readers have as much information as

they can hope for from such sources. So far as legislation can produce any effect, it must be looked for in congress; the State is, of course, powerless in that direction. Fifteen years ago, wise action in the national legislature would have saved the country from the universal collapse which has fallen upon all business pursuits. At that time the whole amount of currency in circulation in the United States was estimated at between two and three hundred millions of dollars. Within four years from that time, the amount was carried up to nearly eight hundred millions, and has hitherto been kept up to over seven hundred millions. The result is the same as has always been produced by similar experiments, ever since a circulating medium has been known and used in the commercial world. There was a rapid rise of prices, wild speculations, all branches of business unduly stimulated, over-trading, luxurious habits of living, general demoralization, followed by the inevitable revulsions, wide-spread bankruptcy, suspension of industries, and multitudes of people deprived of employment and of the means of supporting life. Whilst we can only look to Congress for any legislative measures of relief from this state of things, it is quite evident that very little can be hoped for in that way. Substantial relief will only be obtained by a correction of the bad habits into which we have been led; by a return, if need be, to the simplest industries, to a reduction of all unnecessary expenditures, and a rigid economy, both in public and in private life.

RAILROAD REPORTS.

Complaints are frequent among persons interested, both stockholders and bondholders, that the reports now rendered by railroad companies, including those operating street roads, are not in such forms as to afford a clear and satisfactory view of their condition. These corporations being creatures of the State, endowed with great privileges, it is right that we should require from time to time, from each one of them, a full and clear exposition of its situation. Companies whose affairs are in a good condition will have no objection to this being made known, and it is due to the people that if any are unsound their condition should be exposed as promptly as may be. Concealment of such a state of facts from all but a few principal managers will often enable those who are most to blame for waste and loss to shift the burden thereof upon the shoulders of innocent persons.

A memorial has been sent to me, addressed to you and to the Legislature of all the New England States, recommending a certain form of returns, which has been agreed upon, after consultation with some prominent railroad companies, in a conference of the commissioners of those States, and the State Engineer and Deputy State Engineer of this State. The memorial is signed by all these parties. One object in view is that the returns shall be of one and the same form in all the States, with the hope, no doubt, that this uniformity will be extended to those of the whole country. It is obvious that where the line of a railroad extends into two States, as is frequently the case, it must be more or less inconvenient to the company to make up its statements in two different forms, and that, moreover, there will be advantages to the public in having these returns uniform. I suggest to you an amendment of the general railroad law, giving to the State Engineer the power to prescribe the form of the returns — the same power that is vested in the railroad commissioners in Massachusetts — and such other power pertaining in that State to rail-

road commissioners as may be necessary to ensure and enforce a proper exposition of the actual condition of these companies. You will be able to judge of this matter better after an examination of the memorial, and the papers accompanying it, which I shall cause to be sent to you. The form upon which the memorialists agreed will be found in the possession of the State Engineer.

INSECURITY OF PLACES OF PUBLIC RESORT.

The recent calamity at the Brooklyn Theater, said to be unequalled in horror by any like event heretofore, calls our attention most forcibly to the duty of providing by law, and by the severest penalties, against such disasters in the future. Those who seek to make money by gathering the people in crowds into their buildings, are bound to take every precaution to insure their absolute safety. The Legislature should enact regulations for all such buildings, so as to provide for the prompt suppression of fire and rapid egress for the crowd in case of alarm. In fact, the provision for safety and for exit should be so complete and so manifest that panics would not occur.

The danger is not limited to theatres and places of public amusement; rooms used for lectures or for public meetings, our large school-houses and even churches are, for the most part, so constructed that in case of panic a large number of the crowd within is likely to be fatally injured in the fierce, natural struggle to escape.

The buildings owned by the public are as faulty as those used for private purposes. We are familiar with one or more fatal disasters among the children who, in cities, are crowded into four-story school-houses.

Attention should, also, be given to the security of passengers in cases of fire upon steamboats and railway trains.

Nothing more than this brief allusion to the topic can be necessary. Even without it, I am confident that you would promptly have given your attention to the subject.

MUNICIPAL REFORM.

The report of the commission, appointed by my predecessor, to consider the subject of the government of cities, has not yet been received. I hope that I shall be enabled to present it to you early in your present session. In some respects the government of the city of New York is in almost a chaotic condition; appropriations of money are regulated, not by the Common Council, but by a board of four persons, of whom only one is chosen by the people. The distribution of administrative and legislative powers is imperfect and uncertain. An out-going mayor has power to appoint, in some cases, subordinate administrative officers for a term exceeding that of the incoming mayor. Of the enormous debt resting upon the city, as I learn from one of the commissioners, the amount of \$85,000,000 has been created by direct action of the State Legislature, without being asked for or approved by the common council of the city or the board of supervisors of the county, or by its taxpayers or its people. There are twenty-one of these objectionable laws still in force, under which the full amount of debt authorized by them has not, as yet, been contracted. It would be well to examine into this matter at once for the purpose of repealing such of these acts as, in your judgment, should not be left in force. In some of the acts the amount of indebtedness has no limit, but it is provided that, on the simple requisition of a subordinate administrative department, bonds of the city may

be issued, provided that they do not exceed a certain sum per annum. The number of years during which the acts may continue to apply is not defined. The laws referred to are, in many instances, imperative, requiring the debt to be contracted.

The evil practice of commanding the creation of debt for local purposes, by local governments, is not confined to laws relating to the city of New York alone. Upon our statute book will be found many acts "authorizing and requiring" boards of supervisors, trustees of villages and the like, not only to levy extraordinary local taxes, for purely local purposes, but to incur indebtedness for such purposes. The duty of the Legislature in such matters is properly defined in article 8, section 9, of the Constitution, which says: "It shall be the duty of the Legislature to provide for the organization of cities and incorporated villages, and to restrict their power of taxation, contracting debts," etc. Whenever the Legislature undertakes to impose on a neighborhood local taxes or local indebtedness for local purposes, it assumes to have a knowledge of the case which none can have except those who live in the neighborhood affected. It undertakes to discharge the functions of village trustees, town officers, city aldermen or supervisors of counties; for which functions the men selected especially for these places are better fitted. Whatever evils may occasionally appear in local government should be remedied by the people at home, upon whom the responsibility should rest.

CORRUPT USE OF MONEY IN ELECTIONS.

The Constitution and laws of this State contain many very stringent and excellent provisions for securing the purity of the ballot box and preventing the corrupt use of money in elections. The penalties which they inflict upon those criminals who violate them are very severe. It is, however, apparent that in every important election the laws upon this subject are grossly violated, or evaded. I recommend a thorough re-examination and revision of them with a view of rendering convictions more certain and with additional and severer penalties. So vitally important is the preservation of the purity of elections to the permanent existence of our form of government, that in my opinion any man who buys or sells a vote should be forever thereafter disfranchised and subjected to such other penalties as will be most likely to prevent the commission of the crime.

BETTING UPON ELECTIONS.

Another gigantic evil, closely allied to the corrupt use of money, is the practice of betting upon the results of elections. This practice has always existed to some extent; but it, and the evils resulting from it, have recently been developed to an alarming extent. It is unquestionably true that many millions of dollars were staked upon the result of the late election. Every person interested in such bets had a strong motive for corrupting and bribing voters, and there is no doubt that many yielded to the temptation. The heat and excitement of the contest were also greatly intensified by the same cause. I recommend the enactment of a law, with severe penalties, entirely prohibiting all bets, direct, or indirect, upon the result of any election.

NATIONAL AFFAIRS.

The recent presidential election threatens to prove an epoch of solemn portent in our history. For the first time in the twenty-two elections which have been held for President and Vice-President of the United

States, the result remains a subject of controversy after the canvass of the votes within the States has been made and announced. The two houses of Congress have been heretofore repeatedly required to pass upon the authenticity and validity of electoral votes, but in no former instance has the election turned upon the questionable votes. In every former case the result has been determined by electoral votes which were not in controversy. In the present instance one candidate for President and one candidate for Vice-President have received 184 undisputed electoral votes, as well as a popular majority exceeding a quarter of a million. Another candidate for President and another candidate for Vice-President have received 165 undisputed electoral votes. All the votes of three States — four in Florida, eight in Louisiana and seven in South Carolina — making nineteen in all, are still in dispute; also one of the three votes of Oregon. In all these cases two sets of returns have been "transmitted to the seat of government, directed to the President of the Senate," to await the action of the two houses of Congress whose duty it is to verify, ascertain and count the electoral votes.

In a situation involving such momentous results as the chief magistracy of this republic, all the baser as well as the better forces of society are naturally embattled to secure the prize. It is in such crises of history that the controlling force of cardinal principles is liable to be weakened, dangerous concessions to be made, perilous precedents established, sacred traditions violated, and the most important bulwarks of constitutional freedom rendered less secure.

In Louisiana we have seen a State government imposed on the people by the military force of the federal executive, under color of a pretended order of a federal judge, which order in itself was void, and which led to the resignation of the judge who made it, to escape impeachment. We have seen the government thus imposed by military force condemned as illegal and a mere usurpation, by both houses of Congress, and the electoral votes given under its auspices, rejected in the counting of the presidential votes in 1873 by the concurrent judgment of the same tribunal. We have seen the government so imposed create "a returning board" practically vested with absolute power to revise and, if they please, to reverse the results of the election by the people of the State, and thus organize a political mechanism under which an oligarchy in temporary possession of the legislative power of a State might perpetuate their ascendancy indefinitely.

I pause here in this statement to interpose, in behalf of the people of this great commonwealth, a solemn denial of the power of any State government or of the federal government to vest such powers as are claimed by the Louisiana returning board in any canvassing board whatever.

In the first place, such powers in respect to the choice of presidential electors are not warranted by, but are repugnant to the Constitution of the United States. The provision of section 1 of article 2 of that instrument, "that each State shall appoint, in such manner as the Legislature thereof may direct, its presidential electors," does not confer on the Legislature of a State an unlimited power over the subject. No one will pretend that a temporary majority in the Legislature of a State could grant to an individual or to a set of individuals, the power to appoint presidential electors; that it could make this grant for a period of years, or indefinitely, or to his or their heirs or assigns.

What it cannot do in form it cannot do in substance; what it cannot

do directly it cannot do indirectly. The choice which a Legislature is authorized to make for a State, in the mode of appointing presidential electors, is limited to a mere selection between certain known forms of action, recognized in the practice of popular government, and consistent with the nature of popular government. It is a choice of modes, but must not change or destroy the essential character of the thing itself. It is subject to the condition that "the *State* shall appoint" the presidential electors. The State, that is, the political community known in our jurisprudence and constitutional law by that name, must "appoint," and in doing so it must act by and through its known and rightful organs. At the time this provision of the federal Constitution was adopted, it was contemplated that the Legislature of a State possessing all the governmental powers not withdrawn by the provisions of the State Constitution, or transferred to the government of the Union, might itself choose the electors. And, indeed, that was the mode at first generally practiced by the States. The State Legislature at that time was regarded as the most natural and the legitimate organ of the State. The power to choose presidential electors might properly be conferred upon the people of the State by a general ticket, the voters throughout the State choosing all the electors; or they might be chosen by the people of the State voting in districts, each district choosing one elector. These were methods consonant with the principles of our system of government, and by either of which it could be properly said that the State did, in fact, "appoint" the electors.

It is historically certain that these different modes were in the contemplation of the convention which formed the Constitution. Experiencing some difficulty, however, in imposing this duty upon all the States by any one uniform system, it devolved upon the Legislatures of each State the authority to choose from among these methods, one for the exercise of that power which it granted in declaring that "each State shall appoint."

While the Legislature of a State may provide that presidential electors shall be appointed by an election of the people, it cannot provide that that election shall not be a reality; that it shall be a sham, and that the actual power of determining the choice shall be invested in a packed committee, whether it be called a "returning board," or by any other name.

Neither can it invest a board of canvassers with indefinite or with arbitrary powers, nor with any authority which, by the principles and practice of our jurisprudence, and the policy of our elective system are not fairly incident to the function of ascertaining the vote of the people. This seems to me to be the obvious, the wise interpretation of the Constitution of the United States and of its laws. Any other doctrine will open the way to abuses, frauds and usurpations, which must end in destroying popular elections. The moment we depart from a strict construction of grants of power in derogation of the integrity and efficiency of the elective system, we shall be able to find no rule that will protect the rights of the people. We shall tempt transient majorities to seek to prolong their power by tampering with the machinery of elections, and the easiest, most convenient and most effectual method for such a purpose is by the contrivance of returning boards, which shall be packed and equipped with powers hitherto unknown to our laws and practically subversive of the will of the people.

In the particular case of Louisiana, other equally grave illegalities are

believed to exist. The powers vested in the returning board are inconsistent with the provision in the Constitution of that State which guarantees the elective franchise to voters, and also with the provision which confers the judicial power upon the courts. It is probable that the powers of this board, by the law of Louisiana, do not apply to presidential electors; that the board itself was not constituted in accordance with the law under which it was created; and finally, that a condition, without which the returning board could not get jurisdiction in the cases where it assumed to reject votes of whole districts, was not complied with. There is every reason to believe that the authority exercised by that returning board is void, as repugnant to the Constitution of the United States, and also to the Constitution and laws of Louisiana.

In this state of the law, that returning board, according to public statements of conceded facts, by manipulations of the returns, have changed a majority for one set of presidential electors of about 9,000 to a majority for another set of about 4,000, which would be equivalent to a change of over 80,000 votes in the State of New York.

In Florida we have seen a board of State canvassers, solemnly adjudged by the highest court in the State to possess none but ministerial powers, assume the authority to reverse the choice of electors as shown on the face of the returns made by the officers who conducted the elections and received the votes; and to do this in open disobedience and contempt of the judicial tribunal having jurisdiction in such matters, and vested with the right of final judgment.

In South Carolina we have seen the board of State canvassers fabricating a canvass in like disobedience and contempt of the Supreme Court having jurisdiction and the right of final judgment; we have seen federal soldiery take possession of the capitol of the State, and a corporal at the door determining who were the elect of the people and who were to be permitted to represent them as legislators. Notwithstanding some of these acts have been disavowed by the federal executive, no mark of disapprobation has been put upon the authors of the outrages; the officer in command goes still unrebuked, and when the returning board were committed to prison for contempt, by the highest court in the State, a judge of the United States District Court is sent down to South Carolina, and, without jurisdiction in the case, grants a writ of *habeas corpus*, and discharges the offenders. These proceedings are the more extraordinary and alarming when we consider that such violations of law and of right have been resorted to to overturn elections, all the officers conducting which, were of the same political party with the candidates in whose favor these acts have been committed; that the elections were held under the surveillance of troops of the United States, without any constitutional warrant for their presence, and that the judicial decisions thus set at naught cannot be suspected of any partisan bias, for they were rendered both in Florida and South Carolina by judges all of whom were of the same political party with the returning board.

These interferences of the military power have been committed in flagrant violation of the Constitution and laws. They were not provoked by domestic violence; they were not invited in the only way that would have made them constitutional, by the Legislature of the State; and they were continued after the election was over and during all the subsequent proceedings of the canvassing board. Their tendency was to overawe the voter under the pretense of keeping the peace, though by measures in themselves unlawful, and to deliver dishonest officials from

the natural sense of responsibility and the natural timidity in regard to the consequences of their acts, which are providential limitations to men's conceptions of the crimes upon which they may venture.

While these things were going on in the South a member of the Cabinet at Washington was acting as chairman of a partisan National Committee, and with the co-operation of some of his colleagues in the Cabinet, counselling and systematically stimulating these desperate measures.

The result which these proceedings seem designed to accomplish cannot be secured without one farther step in the processes of usurpation. The fabrication of electoral votes amounts to nothing unless they can be counted by the tribunal whose constitutional duty it is to verify and authenticate them. That inexorable necessity has given birth to a new device for counting the votes, not only unknown to the Constitution but in conflict with the construction hitherto always accepted, and with the invariable practice and precedents. That device is for the President of the Senate to usurp the power of determining what votes shall be counted and what shall not be counted, and to exercise that power in disregard of the orders of the two houses. It would not be credible that so monstrous a claim as this could be seriously asserted if leading Senators had not publicly avowed it.

Nothing could be more abhorrent to the spirit of our system of government than such a one-man power. The President of the Senate is elected by the Senators, and they in turn are elected by the State legislators. He is, therefore, three removes from the people. If such a power were to have been vested in a single man, a depository would have been chosen not so far removed from popular accountability. But the people of this country will never vest such a power in any one man, however selected. They will never consent to a new construction of the Constitution and laws that bears such fruit. They will stand firmly in the ancient ways, and insist that the electoral votes in this emergency shall be counted as they have always been counted, by the two houses of Congress, and by nobody else. They will look with just suspicion upon the purposes of any who would propose to depart from the precedents which have been hallowed by time, and the uniform practice of the republic from its foundation.

The Constitution of the United States confers upon the President of the Senate no power whatever in respect to the counting of the electoral votes, except "in presence of the Senate and House of Representatives," to "open" all the certificates which may be transmitted by the colleges to the seat of government, directed to him.

The Constitution confers upon the President of the Senate no power to determine the authenticity and validity of an electoral vote, or to interfere in any wise with any such question.

No President of the Senate has ever claimed or exercised such a power at any of the twenty-one presidential elections that have occurred under our Constitution.

The mode of procedure for the counting of electoral votes has been invariably regulated by the two houses of Congress, by concurrent resolution or standing rules adopted before the count. Those resolutions or rules have prescribed every step in the whole process; every function of the tellers and of the President of the Senate, whenever any additional service, even of the most formal sort, has been required of him.

In every instance the counting has been conducted in conformity with

the procedure thus prescribed by the two houses ; by servants designated by the two houses under instructions and in the presence of the two houses, and with the entire concurrence and the implicit obedience of every President of the Senate who has participated in these ceremonies.

So often as any question has arisen as to the authenticity or validity of an electoral vote, the two houses have assumed and exercised the exclusive power to act upon and determine that question. They have, in contemplation of law, themselves made every count; they have from the first, assumed exclusive jurisdiction to regulate and govern the whole transaction by temporary concurrent orders adopted for the occasion, by standing joint rules and by the enactment of laws. Such has been the uniform and uninterrupted course of precedents, the invariable practice of the government, and the official exposition of the Constitution which has been deliberately adopted, invariably acted upon, and universally accepted.

No fitter repository of all such powers as are vested in or must of necessity be exercised by the government, can be found than the two houses of Congress. They are not only the general agents of the people under our representative system, but in case of the failure of a choice of President and Vice-President by the electoral colleges, they are expressly charged by the Constitution with the duty of making the election.

The people of the United States will never consent to have their Representatives in Congress stripped of these powers, or tolerate this usurpation by a deputy of the Senate, or by any single person, and still less by an officer who is frequently interested as a candidate in the result of the count.

In this sentiment and purpose the State of New York cordially concurs. Foremost among all our American commonwealths in population, in the variety and extent of her industries and interests, she has in every vicissitude of public affairs put forth all her strength, moral and physical, to maintain the existence and the just authorities of the Union. and she can never consent that the time-consecrated methods of constitutional government shall be supplanted or overthrown by revolutionary expedients.

Mr. Speaker presented a communication from his excellency the Governor, in the words following:

STATE OF NEW YORK — EXECUTIVE CHAMBER,)
ALBANY, *January 9, 1877.* }

HON. GEORGE B. SLOAN, *Speaker of the Assembly*:

DEAR SIR. — I have received from the Secretary of State a communication from which the following is an extract:

"I wish to call your attention to the very imperfect condition in which the bills from the Legislature frequently come to this office. They are not only often carelessly written and punctuated, but erasures are freely made by the engrossing clerk, which are calculated not only to throw serious doubt upon their authenticity, but bring all through whose hands they pass in all time to come under the possible suspicion of tampering with them."

The Secretary of State also caused several specimens of the alterations referred to, to be exhibited to me. The great impropriety of them is apparent. There is nothing to show when or by whom they were made. The probability is that they were made by the engrossing clerks for the purpose of saving themselves the labor of engrossing the bills anew. However this may be, I think it my duty to call the attention of the presiding officers of the Senate and Assembly to the matter, and to say that I shall feel constrained to disapprove any bill in which such alterations appear.

I am, with great respect,

Yours, etc.,

L. ROBINSON.

Whereas, The present system of taxation in the State of New York is glaringly defective, partial and oppressive, as it permits the largest portion of personal and corporate property to escape taxation by many evasions and subterfuges; and

Resolved, That the committee on general laws is hereby respectfully directed to report to this House, at an early day, a bill correcting this great wrong to the freeholders, relieving them from an unjust burden and fixing it so that a just proportion of our yearly tax may be placed on all personal and corporate property, of which the greater portion, under the present system, now escapes all taxation.

Mr. Hodges offered the following as a substitute:

Whereas, The present system of assessment and taxation in this State is defective and inferior to the systems adopted by many other States; and

Whereas, A vast amount of personal property is now exempt by law, and by the action of its owners in evading taxation, thus burdening, to an excessive degree, the real estate, by imposing more than its due share of tax upon this species of property; therefore, be it

Resolved, That the committee on ways and means are hereby instructed to report to this House, at an early day, what amendments to our present law are necessary in order to secure a more thorough assessment and taxation of personal property in this State, and if the remedy sought

cannot be attained by an amendment to our present laws; that said committee be also requested and directed to report to this House, at an early day, whether a radical change in our entire system of assessment and taxation and the adoption, in whole or in part, of certain features in the systems of certain other States, especially those of Pennsylvania, Ohio and the New England States, is desirable in this State.

Mr. Hogeboom offered a substitute, in the words following:

Resolved (if the Senate concur), That we look upon the present attempt on the part of Congress, to provide for the counting of the electoral vote, as a departure from the established usage, and a bold step in the direction of that invasion, from the legislative department which the fathers, by their foresight, were enabled to discover as the tendency of all modern governments, and against which, as our early history clearly shows, they intended to place, and as they supposed, had placed, the strongest bulwarks. This invasion is none the more justifiable, because in the guise of compromise, it is in reality in violation of those sacred compromises upon which the government itself was founded, and without which it could not at the time have been established, nor the less dangerous, because under a grave menace, the present opportunity is employed to accomplish it. That the Constitution, and by the lights its framers placed beside it, has left no reasonable doubt as to what was intended to be provided upon this subject, and the long line of precedents established in conformity with contemporaneous interpretation, should be accepted as satisfactory authority, and affords at this time the safest guide.

Ordered, That the Clerk return said bill to the Senate, with a message informing that the Assembly have passed the same.

The hour of 2 o'clock having arrived, the House adjourned.

WEDNESDAY, JANUARY 31, 1877.

The House met pursuant to adjournment.

Prayer by Rev. J. B. Campbell.

The journal of yesterday was read and approved.

A message from the Senate was received and read, requesting the concurrence of the Assembly to the resolutions in the words following:

Whereas, The annual message of his excellency the Governor invites the attention of the Legislature to the questions growing out of the recent presidential election; and

Whereas, The Constitution of the United States provides that in the election of the President each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress, which electors are to meet and cast the vote of the State, and certify and transmit the same to the seat of the government of the United States, directed to the President of the Senate; therefore

Resolved (if the Assembly concur), That this provision fixes the intent of the Constitution, that the several States shall determine each for itself the mode of appointing the electors and of lawfully establishing who are appointed; and that the vote of the electors thus appointed and lawfully certified shall be received and counted as the vote the State.

Resolved (if the Assembly concur), That a majority of the votes of the electors thus appointed by the several States, and meeting in their respective States in conformity with law, on the sixth day of December last, determined the election of President and Vice-President of the United States, and that it only remains to make lawful declaration of the result so determined.

Resolved (if the Assembly concur), That every State in full and undisturbed relations with the Union is entitled to participate in the election of President, and that the lawfully certified votes of its electors appointed in the manner directed by its Legislature and subject only to the constitutional conditions, represent and embody the expressed will of the State in accordance with the principles enunciated by Daniel Webster, "that the will of the people must prevail when it is ascertained," and that the only mode of ascertaining that will is "by some regular rule of proceeding prescribed by previous law."

Resolved (if the Assembly concur), That the declaration of the result of the presidential election should be strictly governed by the principles of the Constitution and by the established usages and practices under it; that the action of the convention which framed the Constitution in organizing the new government thus created, when they resolved that the "Senators should appoint a President of the Senate for the sole purpose of receiving, opening, and counting the votes for President;" that the argument of Charles Pinckney, a distinguished member of the convention, made in the debates of eighteen hundred, in which he stated that "in the federal convention great care was taken to provide for the election of President independently of Congress; to take the business, as far as possible, out of their hands;" that the opinion of Henry Clay, expressed

in subsequent debate, in which he declared that, unless the two houses agreed upon a different method, "the President of the Senate would proceed to open and count the votes;" that the opinion of Chancellor Kent, which, for half a century, has remained unchallenged and unquestioned, in which "he held that, in the absence of legislative provision on the subject, the President of the Senate counts the votes and determines the result," combine to interpret the intent of the framers of the Constitution. Without going beyond its appropriate province, the Legislature of New York earnestly insists that no partisan efforts should be allowed to defeat or embarrass the orderly course of law which is so essential to the welfare and perpetuity of the republic.

Resolved (if the Assembly concur), That the lawful declaration of the result of the election of President, as determined by the vote of a majority of the electors on the sixth day of December last is binding upon all, and that in making such declaration and in upholding the Constitution and the laws, the National authorities are entitled to the support of every patriotic citizen.

Resolved (if the Assembly concur), That any threat to disregard the result of the Presidential election, and its lawful declaration, is incendiary in spirit and revolutionary in character; that every attempt to inflame partisan feeling, and excite political passions, upon a question which has passed beyond the appropriate arena of partisan conflict, and remains only to be declared according to truth and law, calls for unqualified condemnation, and that the united voice of the people must enforce, as the supreme obligation of the hour, the duty of prompt and unhesitating acceptance of the legal determination.

Said resolutions being concurrent,

Ordered, That the same be laid on the table.

Mr. Speaker presented a message from his excellency the Governor, in the words following :

STATE OF NEW YORK — EXECUTIVE CHAMBER, }
ALBANY, *January 31, 1877.* }

To the Assembly :

I have the honor herewith to transmit to your honorable body the annual report of the Cooper Union for the Advancement of Science and Art, of the city of New York.

L. ROBINSON.

Said report was laid on the table and ordered printed.

(*See Senate Doc. No. 30.*)

Mr. Speaker presented the annual report of the President of the Inebriates' Home for Kings county for the year 1876 ; which was laid on the table and ordered printed.

(*See Doc. No. 36.*)

The hour of 2 o'clock having arrived, the House adjourned.

THURSDAY, FEBRUARY 1, 1877.

The House met pursuant to adjournment.

Prayer by Rev. Mr. Bridgford.

The journal of yesterday was read and approved.

Mr. Alvord rose to a question of privilege and said : Day before yesterday the gentleman from Steuben, who sits on my left (Mr. Ruggles), introduced a resolution in reference to Normal schools, asking that the committee should be instructed to report in their judgment what might be necessary in the coming future in regard to these schools. The New York Tribune correspondent conveyed the idea to his paper in very strong language, that it was a resolution of instruction, and that this Assembly had committed itself to the proposition to destroy the Normal schools ; and that was followed by an editorial in that paper saying that the Assembly had been foreclosed against these schools, and they could only look in the coming future to the Senate to save them from destruction. Now, sir, I will always, when a resolution of inquiry is offered here, vote

to have it go to the proper committee. It is due from me in courtesy to my fellow member to vote for his resolution. But I desire to say here that I do not think this House has committed itself at all to the proposition of the gentleman from Steuben — I most certainly have not, and shall vote against any such proposition on its final consideration.

By unanimous consent,

Mr. Baker, from the committee on canals, to which was referred the bill introduced by Mr. Baker, Int. No. 166, entitled "An act in relation to the office of Superintendent of Public Works, and changing the mode of disbursements on account of the canals," reported in favor of the passage of the same, with amendments, the title amended so as to read "An act in relation to the office of Superintendent of Public Works, defining the powers of the Superintendent, and prescribing the mode of disbursements on account of the canals," which report was agreed to, and said bill committed to the committee of the whole.

Mr. Baker moved that said bill be made a special order for Monday evening, February 5, immediately after the reading of the journal.

Mr. Speaker put the question whether the House would agree to said motion, and it was determined in the affirmative.

By unanimous consent,

Mr. Baker, from the committee on canals, to which was referred the bill introduced by Mr. G. M. Case, Int. No. 248, entitled "An act to provide for the construction of fish-ways in the State dams across the Oswego, Oneida and Seneca rivers," reported in favor of the passage of the same, with amendments, which report was agreed to, and said bill committed to the committee of the whole.

The privileges of the floor were granted to the Hon. A. J. Campbell. Leave of absence was granted to Messrs. Dillmeier and S. Baldwin.

This being the day assigned by the rules for the consideration of general orders,

The House resolved itself into a committee of the whole on the bills entitled as follows:

Mr. Hepburn, from said committee, also reported in favor of the passage of said third mentioned bill, with amendments; which report was agreed to, and said bill ordered engrossed for a third reading.

"An act to provide for the completion of the court-house in the third judicial district in the city of New York."

"An act to regulate the course of proceedings at the trial on a charge of felony, after previous conviction for felony or petit larceny."

And after some time spent therein, Mr. Speaker resumed the chair, and Mr. Gallagher, from said committee, reported in favor of the passage of said first mentioned bill ; which report was agreed to, and said bill ordered engrossed for a third reading.

Mr. Gallagher, from said committee, also reported progress on said second mentioned bill, and asked leave to sit again.

The question being on granting leave,

Mr. Mitchell moved to disagree with the report of the committee of the whole, and that said bill be ordered to a third reading.

The committee of conference to consider and determine the differences arising between the two Houses upon the bill entitled "An act to extend the powers of county judges when holding courts in other counties than their own," reported that they had met and duly considered the same, and agreed to report as follows :

That the amendment to said bill, as proposed by the Assembly, be so modified that the bill shall read as follows :

Provided, however, that nothing herein contained shall empower him to perform the duties of surrogate in such other county.

§ 2. This act shall take effect immediately.

Mr. Speaker then put the question whether the House would agree to said report, as amended, and it was determined in the affirmative.

Said bill was then ordered engrossed for a third reading.

The Private Secretary of the Governor appeared in the Assembly Chamber, and presented two communications from His Excellency the Governor, in the words following :

STATE OF NEW YORK — EXECUTIVE CHAMBER,)
ALBANY, *February 8, 1877.*)

To the Assembly :

I return herewith, without my approval, Assembly bill, not printed, entitled "An act to legalize and confirm the official acts of J. Marshall Guion, a justice of the peace in the town of Seneca Falls, in the county of Seneca, and to enable him to take and file his oath of office."

The bill is based upon the fact that the justice did not take or file the oath required by the Constitution and laws before entering upon the duties of his office, or within the time prescribed. Being of opinion that the effect of such omission was a forfeiture of his office, and that the Legislature had no power to reinstate him, I referred the matter to the Attorney-General, and have received from him the following opinion :

"HON. LUCIUS ROBINSON, *Governor :*

"Sir — I am of the opinion that a law which continues in office a justice of the peace who has neglected to file his oath of office within the time fixed by law, is unconstitutional.

"Article VI, section 18 of the Constitution, is as follows : 'The electors of the several towns shall, at their annual town meeting, and in such manner as the Legislature may direct, elect justices of the peace, whose terms of office shall be four years. In case of a vacancy occurring before the expiration of a full term, they shall hold for the residue of the unexpired term.'

"Article X, section 5, is as follows : 'The Legislature shall provide for filling vacancies in office, and in case of elective officers, no person appointed to fill a vacancy shall hold his office, by virtue of such appointment, longer than the commencement of the political year next succeeding the first annual election after the happening of the vacancy.' Section 8 is as follows : 'The Legislature may declare the cases in which any office shall be deemed vacant when no provision is made for that purpose.'

"Article XII requires an oath. Section 21, p. 109, vol. 1, R. S., Edms. ed., fixes the time within which the oath must be filed. Section 34, p. 112, of same volume declares that an office shall become vacant upon the neglect or refusal of the incumbent to take the oath of office within the time required by law. And chapter 474 of the Laws of 1859, prescribes the mode of filling vacancies in the office of justice of the peace.

"All the contingencies contemplated by the Constitution in the above

cited provision have been provided for by the Legislature in the above cited statutes. Therefore, the failure to take the oath, creates a vacancy. The law provides for filling the vacancy by appointment; but the Constitution forbids the holding of the office so filled longer than the commencement of the political year next succeeding the first annual election after the happening of the vacancy. A law which attempts to continue an elective officer longer than that time is directly in conflict with the Constitution.

"The logic of certain decisions of the Court of Appeals, I believe fully bears out this view. These decisions are:

"People ex rel. v. Crooks, 53 N. Y., 648.

"People ex rel. v. McKinney, 52 N. Y., 374.

"People ex rel. v. Bull, 46 N. Y., 57.

"Very respectfully your obedient servant,

"CHARLES S. FAIRCHILD, *Attorney-General*."

In this opinion of the Attorney-General I fully concur. If the office was forfeited the Legislature has clearly no power to fill the vacancy. If it was not forfeited the bill is unnecessary.

L. ROBINSON.

Mr. Husted moved that the message of the Governor be printed, and the message and bill referred to the committee on general laws.

Mr. Speaker put the question whether the House would agree to said motion, and it was determined in the affirmative.

STATE OF NEW YORK — EXECUTIVE CHAMBER, }
ALBANY, *February 8, 1877.* }

To the Assembly:

I return without my approval Assembly bill No. 17, entitled "An act to amend an act entitled 'An act to incorporate the city of Binghamton, passed April 9, 1867,' and the acts amendatory of the same."

The bill proposes to amend the first section of title five of the charter of the city of Binghamton by striking out from said section (which enumerates the powers of the mayor) this sentence: "He shall be *ex-officio* a member of the board of education." The sole object of the bill, therefore, is to remove the mayor from the board. I can see no good reason for this change. The board of education expends a large proportion of the taxes of the city, about one-half thereof, as I am informed. While the mayor has a veto upon all the appropriations made by the common council, neither he nor any other officer has any such power in regard to appropriations made by the board of education. It seems to be a very wise and just provision, therefore, that he should be a member of that body. He is the only member of it elected by the people of the whole city. There is no evidence that the proposed change in the charter is desired by the people of the city. On the contrary, the common council, by a strong majority, have passed resolutions disapproving it, and a great many prominent citizens, without regard to party, have signed petitions to the same effect.

L. ROBINSON.

Mr. Moody moved that the message of the Governor relating to Assembly bill, No. 17, entitled "An act to amend an act entitled 'An act to incorporate the city of Binghamton, passed April 9, 1867,' and the acts amendatory of the same," be laid on the table.

Mr. Speaker put the question whether the House would agree to said motion, and it was determined in the affirmative.

Mr. Husted moved that the time of this session be extended until the Speaker has cleared his desk.

Mr. Speaker put the question whether the House would agree to said motion, and it was determined in the affirmative.

The Senate returned the bill entitled "An act to amend an act entitled 'An act for the incorporation of villages,' passed April 20, 1870, so far as the same relates to the village of Brockport, in the county of Monroe," with a message informing that they had passed the same, with the following amendment:

Strike out all after the enacting clause and insert as follows:

SECTION 1. Subdivision twenty-three of section three of title three of chapter two hundred and ninety-one of the Laws of eighteen hundred and seventy, entitled "An act for the incorporation of villages," is hereby amended so as to read as follows:

23. To regulate the use of candles, kerosene or burning materials of any kind, or lights or fires in barns and stables, and other places liable to take fire, and to control the construction of buildings, as to material, and prescribe the limits within which wooden buildings shall not be built, and prescribe the penalty, not exceeding one thousand dollars, for a violation of any ordinance passed relating thereto.

§ 2. This act shall take effect immediately.

Amend the title so as to read as follows: "An act to amend chapter 291 of the Laws of 1870, entitled 'An act for the incorporation of villages.'"

The amendment having been read,

Mr. Speaker then put the question whether the House would concur in the same, and it was determined in the affirmative, a majority of all the members elected to the Assembly voting in favor thereof.

Mr. Speaker then announced the third reading of the bill.

Mr. Alvord raised the point of order that the question was upon the motion of Mr. Gallagher to recommit.

Mr. Speaker ruled the point of order not well taken, the previous question having been ordered the question now was upon the final passage of the bill.

Mr. J. S. Graham appealed from the decision of the chair.

Mr. Speaker said: The chair will state, in reference to his views upon this question, that he regards the main question to be upon the passage of the bill. While the Clerk was reading the bill, a motion was made to recommit the bill to the committee on the judiciary; but, according to the recollection of the chair, *without instructions*. The chair regards the motion to recommit as a privileged motion, but of a lesser grade than the motion for the previous question. It is a subsidiary motion, one of a class intended to help or to promote, in one way or another, according to the character of the motion, not the immediate passage of the bill, but its being carried forward for future action. This is not in the nature of the main question as the chair regards it, and for that reason, when the motion was made for the previous question, it was not made as applicable to the motion to recommit. The motion was made for the previous question. It thereby becomes necessary for the chair to decide what is the previous question? The chair understands it to be the main question. The previous question is, "Shall the main question be now put?"

The chair submits, is the main question the passage of the bill, or is it the motion to recommit, the latter being a subsidiary motion. If it is the motion to recommit, then the gentleman's appeal is correct; if it is the passage of the bill, then the chair is correct.

The chair will say that he did not understand any instructions to have been embodied in the motion to recommit. If he had understood that there were instructions, if the committee had been instructed to amend, then it would have come within the clear provision of the rule of the House, which provides that when the main question is ordered, it shall first be taken upon the pending amendment — specifically the pending amendment — but not upon any other subsidiary question, and then it extends to the main question. Now, the only doubt that the chair has in his own mind, in reference to the correctness of his ruling, is because of his not understanding that the gentleman from Erie (Mr. Gallagher), embodied any instructions in his motion. With that understanding of the motion, the chair believes that he was entirely correct; he believes he is in accord with the highest parliamentary authorities, but inasmuch as the journal of the House indicates that the motion to recommit was accompanied with instructions, which by a very liberal construction, may be interpreted as implying a possible amendment to the bill, and in deference to the practice of the Assembly in such cases, the chair will modify his ruling, and will rule that the question may be taken upon the motion to recommit. If that motion does not prevail, the previous question will still cohere, and will not be exhausted until the vote is taken upon the passage of the bill.

Mr. Speaker then stated the question to be upon the motion of Mr. Gallagher to recommit said bill.

Mr. Ruggles called for the ayes and noes on the motion of Mr. Gallagher, with the following result:

To the Assembly:

The committee on privileges and elections, to which was referred the following memorial of Waters W. Braman contestant, Fourth Assembly district, Albany county:

“The petition of Waters W. Braman, of West Troy, New York, respectfully represents:

That at the last general election, held on the 7th day of November, 1876, your petitioner was duly elected a member of the House of Assembly from the Fourth district in the county of Albany; that by reason of a gross fraud perpetrated by two of the inspectors of election in the eastern district of the Ninth ward of the city of Albany, the petitioner has been deprived of his right to occupy his seat, in the Assembly, at the opening of this session.

The fraud consisted in a fraudulent altering of the result of the canvass in said district, after such canvass had been completed, and the statement thereof made out and signed by the inspectors, supervisors and witnesses, and the dispersing of the parties lawfully present at such canvass; that such alteration changed the result of the election in said Assembly district, and alone prevented the board of county canvassers from certifying to the election of the petitioner; that the said inspectors of election, committing the said fraud, are now under indictment for the same and awaiting trial; that the vote received by Edward Curran and the petitioner respectively, in said district, outside of said eastern district of the Ninth ward of the city of Albany, as declared by the court of county canvassers, was as follows, to wit: That of Edward Curran, the sitting member for said district was 4,261, that of the petitioner 4,420, giving the petitioner a majority of 159, exclusive of said eastern district of the Ninth ward; that the actual and true canvass of the votes in said eastern district of the Ninth ward of the city of Albany, was as follows:

For the petitioner.....	183
For Edward Curran.....	336

Majority for Curran.....	153
--------------------------	-----

The spurious and fraudulent returns shows:

For the petitioner.....	153
For Edward Curran.....	366

Apparent majority, eastern district of the Ninth ward, for Curran	213
---	-----

Showing that thirty votes were taken from the petitioner's vote and given to Mr. Curran, in the said election district, sufficient to change the result in the Assembly district. The said Edward Curran claims his seat as such member, and has taken the oath of office therefor. Your petitioner therefor prays that this House will declare and determine that your petitioner was elected, and is entitled to his seat as a member thereof, and to all his privileges and rights as such member, and that all such

proceedings may be had without delay as may be necessary in the premises and is usual in such cases.

And your petitioner will ever pray.

(Signed)

WATERS W. BRAMAN.

ALBANY, N. Y., *January 2, 1877.*"

Respectfully report that pursuant to a resolution of this House, the committee met on the 17th day of January, 1877, at the State Library, in the city of Albany, and having adjourned from time to time, have proceeded by a sub-committee of Messrs. Morey, Backenstose and Rockwell to take the testimony accompanying and submitted with this report. It is conceded that the vote in the Assembly district, and as shown by the county canvassers, exclusive of the eastern district of the Ninth ward of the city of Albany, was :

For the contestant (Braman)	4,420
For the sitting member (Curran)	4,261

In relation to the said Eastern District of the Ninth ward of the city of Albany, it is claimed by the contestant that the canvass of the ballots in that district, on the evening of election, as then made and announced, was :

For the contestant	183
For the sitting member	336

And that the certificate of canvass made at that time so showed. That between the canvass and the filing of the certificate with the clerk of the county of Albany, Thursday after election day, the said certificate was altered by substituting for the original middle sheet (there being three sheets in the certificate) a new sheet, showing a forged and fraudulent result in Member of Assembly, by taking thirty votes from the contestant and giving them to the sitting member, thus showing :

For the contestant	153
For the sitting member	366

The evidence of all the parties present at the canvass of the result after the closing of the polls at the said eastern district of the Ninth ward, shows that the canvass proceeded without disagreement or question ; no dispute over the result announced on Member of Assembly, which was :

Curran	336
Braman	183

As a conclusion of fact, your committee find that the vote received in the eastern district of the Ninth ward of the city of Albany, at the late election, was 183 for the contestant and 336 for the sitting member, and not as shown by the certificate, which, in their opinion, was fraudulently altered between the time of its completion on the night of election and its filing with the county clerk, by taking thirty votes from the number belonging to the contestant and accrediting the same to the number given the sitting member, now making, as appears by certificates filed in the clerk's office :

For Curran	4,627
For Braman	4,573

Curran's majority	54
-------------------------	----

When in fact the original certificates showed:

For Braman.....	4,603
For Curran	4,597

Braman's majority.....	6
------------------------	---

Such being the fact, it is clearly evident that but for such fraudulent alterations Mr. Braman would have received the certificate of election from the board of county canvassers, and, in accordance with this judgment, recommend the adoption of the following resolution:

Resolved, That Waters W. Braman is entitled to and is hereby awarded the seat now held by Edward Curran, as Member of Assembly for the Fourth Assembly district of the county of Albany, and that the said Edward Curran be at liberty to contest the seat if he shall desire or be so advised.

Whereas, Ruin and desolation have been entailed upon many once happy homes, by the calamitous failures of life insurance companies, formerly considered bulwarks of strength and solvency; and,

To the Assembly:

The Committee on Privileges and Elections, to which was referred the following memorial of Waters W. Braman, contestant, Fourth Assembly district, Albany county:

"The petition of Waters W. Braman, of West Troy, New York, respectfully represents:

That at the last general election, held on the 7th day of November, 1876, your petitioner was duly elected a member of the House of Assembly from the Fourth district in the county of Albany; that by reason of a gross fraud perpetrated by two of the inspectors of election in the eastern district of the Ninth ward of the city of Albany, the petitioner has been deprived of his right to occupy his seat, in the Assembly, at the opening of this session.

The fraud consisted in a fraudulent altering of the result of the canvass in said district, after such canvass had been completed, and the statement thereof made out and signed by the inspectors, supervisors and witnesses, and the dispersing of the parties lawfully present at such canvass; that such alteration changed the result of the election in said Assembly district, and alone prevented the board of county canvassers from certifying to the election of the petitioner; that the said inspectors of election, committing the said fraud, are now under indictment for the same and awaiting trial; that the vote received by Edward Curran and the petitioner respectively, in said district outside of the said eastern district of the Ninth ward of the city of Albany, as declared by the court of county canvassers, was as follows, to wit: That of Edward Curran, the sitting member for said district, was 4,261, that of the petitioner, 4,420, giving the petitioner a majority of 159, exclusive of said eastern district of the Ninth ward; that the actual and true canvass of the votes in said eastern district of the Ninth ward of the city of Albany was as follows:

For the petitioner	183
For Edward Curran	336
Majority for Curran	153

The spurious and fraudulent return shows:

For the petitioner	153
For Edward Curran	366

Apparent majority, eastern district of the Ninth ward, for

Curran	213
--------------	-----

Showing that thirty votes were taken from the petitioner's vote and given to Mr. Curran, in the said election district, sufficient to change the result in the Assembly district. The said Edward Curran claims his seat as such member, and has taken the oath of office therefor. Your petitioner, therefore, prays that this House will declare and determine that your petitioner was elected, and is entitled to his seat as a member thereof, and to all his privileges and rights as such member, and that all such proceedings may be had without delay as may be necessary in the premises and is usual in such cases.

And your petitioner will ever pray.

(Signed)

WATERS W. BRAMAN."

ALBANY, N. Y., *January 2, 1877.*

Respectfully report that pursuant to a resolution of this House, the committee met on the 17th day of January, 1877, at the State Library, in the city of Albany, and having adjourned from time to time, have proceeded by a sub-committee of Messrs. Morey, Backenstose and Rockwell, to take the testimony accompanying and submitted with this report. It is conceded that the vote in the Assembly district, and as shown by the county canvassers, exclusive of the eastern district of the Ninth ward of the city of Albany, was:

For the contestant (Braman)	4,420
For the sitting member (Curran)	4,261

In relation to the said eastern district of the Ninth ward of the city of Albany, it is claimed by the contestant that the canvass of the ballots in that district, on the evening of election, as then made and announced, was:

For the contestant	183
For the sitting member	336

And that the certificate of canvass made at that time so showed. That between the canvassing and the filing of the certificate with the clerk of the county of Albany, Thursday after election day, the said certificate was altered by substituting for the original middle sheet (there being three sheets in the certificate) a new sheet, showing a forged and fraudulent result in Member of Assembly, by taking thirty votes from the contestant and giving them to the sitting member, thus showing:

For the contestant	153
For the sitting member	366

The evidence of all the parties present at the canvass of the result after the closing of the polls at the said eastern district of the Ninth ward, shows that the canvass proceeded without disagreement or question; no dispute over the result announced on Member of Assembly, which was:

Curran	336
Braman	183

As a conclusion of fact, your committee find that the vote received in the eastern district of the Ninth ward of the city of Albany, at the late election, was 183 for the contestant and 336 for the sitting member, and not as shown by the certificate, which, in their opinion, was fraudulently altered between the time of its completion on the night of election and its filing with the county clerk, by taking thirty votes from the number

belonging to the contestant and accrediting the same to the number given the sitting member, now making, as appears by certificates filed in the clerk's office:

For Curran	4,627
For Braman	4,573

Curran's majority	54
-------------------------	----

When, in fact, the original certificates showed:

For Braman	4,603
For Curran	4,597

Braman's majority	6
-------------------------	---

Such being the fact, it is clearly evident that but for such fraudulent alterations, Mr. Braman would have received the certificate of election from the board of county canvassers, and, in accordance with this judgment, recommend the adoption of the following resolution:

Resolved, That Waters W. Braman is entitled to and is hereby awarded the seat now held by Edward Curran, as member of Assembly for the Fourth Assembly district of the county of Albany, and that the said Edward Curran be at liberty to contest the seat if he shall desire or be so advised.

J. B. MOREY.
JAMES W. HUSTED.
D. B. BACKENSTOSE.
SIMEON R. BARNES.

Mr. Cozans moved to take from the table, and substitute for the majority report the report of the minority of the committee, in the words following:

To the Assembly:

The minority of the committee on privileges and elections to which was referred the petition of Waters W. Braman, contestant of the Fourth Assembly district of Albany county, respectfully submit the following:

The petition of the contestant is set forth in the report of the majority of this committee, and need not be repeated here. As in such report stated, the proofs offered by the contestant and by the sitting member were taken by and before a sub-committee; the testimony has been printed and is before the Assembly. The case of the contestant was made upon a single charge, to wit: That the official returns of the inspectors of election in and for the eastern district of the Ninth ward of the city of Albany, after having been duly made and signed by all the three inspectors and by the United States supervisor on the night of election were, before being filed in the county clerk's office, altered and forged, and the actual vote falsified by making it appear that the number of votes cast in the district for the sitting member was 866, and for the contestant 153, when, in fact, the return as originally made showed, and the fact was that only 336 votes were, cast for the sitting member, and 183 for the contestant. The testimony was conflicting as to the declaration on the night of election, and the fact of what the vote actually was. There was no direct proof of any alteration of the returns. The returns are regular on their face, and the sitting member

was by them, and the certificate of the county board of canvassers clearly entitled to his seat. The burden of proving the alleged fraud and forgery was upon the contestant. In our opinion he failed to make out his case or claim, and the clear weight of evidence was in favor of the correctness of the official returns, and against the charge of fraud and forgery. Of the three inspectors, two testified most positively that the returns were correct, and had not been altered. Of the poll clerks, one impeached the correctness of the return, and one sustained it.

One supervisor impeached and one sustained, and so of the witnesses and other parties there was about an equal division as to what result was announced on election night. The documentary proof was altogether in favor of the sitting member's right and of the correctness and genuineness of the returns. The tally of votes as counted was kept by one inspector, the two poll-clerks and by two witnesses of these, those of the inspectors (the chairman of the board) and of one poll-clerk and of one witness fully sustained the return and were clear and intelligible on their face, while of the other two, one was confessedly erroneous and the other was unintelligible without verbal explanation.

The trifling circumstances relied upon to show the alleged fact of alteration and forgery were insufficient at best and were duly explained. Reluctant as the undersigned are to disagree with the majority of the committee, they cannot but feel that to set at naught the regular returns and certificates of election and to deprive a member of his seat upon such flimsy and unreliable testimony would be to establish a most dangerous precedent. We therefore dissent from the majority report and state that, in our opinion, the sitting member, Mr. Curran, was duly elected and should retain his seat. We cannot close this report without calling attention to the following clause of the majority report: "The evidence of all the parties present at the canvass of the result after closing of the polls at the said eastern district of the Ninth ward, shows that the canvass proceeded without disagreement or question of dispute over the result announced on member of Assembly which was:

Curran	336
Braman	183"

This clause is calculated to deceive, although probably not designed to do so.

It is true that the testimony is undisputed that "the canvass proceeded without disagreement or question of dispute over the result announced on Member of Assembly;" but it is not true that by "the evidence of all the parties present," that announcement or count was for

Curran	336
Braman	183

But in our opinion the decided weight of evidence shows that the announcement or count was as actually returned, and as stated—for Curran, 366, and for Braman, 153, and that Mr. Curran was duly elected.

We, therefore, recommend the adoption of the following resolution:

Resolved, That Edward Curran is entitled to the seat now occupied by him on the floor of this Assembly as member of Assembly, from the Fourth district of the county of Albany.

LUKE F. COZANS.
W. L. ROCKWELL.

Mr. Alvord called for a division of the question.

Mr. Speaker put the question whether the House would agree to said motion to take from the table, and it was determined in the affirmative.

Mr. Speaker then announced the question to be on substituting the minority for the majority report.

Mr. Alvord moved the previous question.

Mr. Speaker put the question, "Shall the main question be now put?" and it was determined in the negative.

Mr. Speaker put the question whether the House would agree to said motion, and it was determined in the affirmative.

Mr. Cozans rose to a question of privilege, saying that he regretted to do so. He referred to a statement in the New York 'Times' Albany correspondence of to-day, intimating that he had been instrumental in surreptitiously inserting in a bill in relation to salaries of county officers, under discussion last evening, an increase of the salary of the surrogate of New York county. He said if the reporter had informed himself as to the facts in the case, he would have ascertained that his statement had no basis of truth. The explanation of the chairman of the ways and means had placed the matter in a clear light, and should have satisfied him on that point. He did not think it necessary to say to this House that he (Mr. Cozans) would not be guilty of such an act, and he animadverted severely upon the article in question, as drawing wrong and unjust inferences. The bill was introduced to benefit the county of Niagara, and in order to render it complete, as other counties were also included, it was necessary to include the sections of the amended bill. It would not affect the surrogate of New York. He had great respect for the members of the press on the floor, but he hoped that they would be more careful in making charges and aspersions without accurate information.

Mr. Hayes also rose to a question of privilege, and stated that he found in the Argus of Saturday a personal allusion to himself, which, perhaps, would not be entitled to be called a question of privilege, only that it referred to him as a Member of Assembly. He asked that the Clerk read the article, which is as follows:

"It is said that when Dr. L. L. Hayes, Member of Assembly from New York, and a relative of the usurping President, heard that Madison Wells' choice had been declared elected, he remarked: 'As a Republican I am glad of it; but, as an American citizen, I am ashamed of it,'"

In reference to this, Mr. Hayes said: I only wish to say that whatever may have been the motive in inserting it, whether it may have been intended as a bad practical joke on the part of the editor of the Argus, or what might have been the motive, I wish simply to have it recorded in the journal that the whole of it from beginning to end is an unmitigated lie.

Mr. Braman offered for the consideration of the House a privileged resolution, in the words following:

Resolved, That Senate bill No. 87, entitled "An act authorizing the board of trustees of the village of West Troy to contract for a supply of water for public purposes," be recommitted to the committee on affairs of villages, retaining its place on general orders.

Mr. Speaker put the question whether the House would agree to said resolution, and it was determined in the affirmative.

Mr. Marvin offered for the consideration of the House a resolution, in the words following:

Resolved, That Assembly bill No. 250, entitled "An act in relation to the Inebriates' Home for Kings county, and to amend chapter 514 of the Laws of 1871, entitled 'An act to amend an act entitled An act to incorporate the Inebriates' Home for Kings county,' passed May 9, 1867, and the acts amendatory thereof, passed April 30, 1868," be considered in the first committee of the whole.

Mr. Speaker put the question whether the House would agree to said resolution, and it was determined in the affirmative, a majority of all the members elected to the Assembly voting in favor thereof.

Mr. Alvord moved to lay the further consideration of general orders on the table.

Mr. Speaker put the question whether the House would agree to said motion, and it was determined in the affirmative, two-thirds of all the members present voting in favor thereof.

Mr. Bowen introduced a bill entitled "An act to authorize the Commissioners of the Land Office to sell and convey lands in Clinton county," which was read the first time, and by unanimous consent was also read the second time, and referred to the committee on ways and means.

Whereas, It is charged that in the city of New York there is a corrupt and powerful combination of life insurance companies known as "The Chamber of Life Insurance," whose avowed and public object is to prevent disclosures and revelations which would tend to impair confidence in insolvent and rotten life insurance companies, and to conceal the dishonest practices and methods in vogue among those more influential and prosperous; and,

Whereas, It is charged that the said "The Chamber of Life Insurance" is a close corporation of persons banded together for the further purpose of improperly influencing the press, the judiciary and legislation; therefore,

Resolved, That a select committee of five, to be appointed by the Speaker, be and it hereby is directed to investigate the affairs of said

"The Chamber of Life Insurance," to inquire into its objects and aims, and that, for the better prosecution of said investigation and inquiry, said committee is empowered to send for persons, books and papers, to examine witnesses, under oath or affirmation, and generally to do in and about said matter whatever it may deem necessary in furtherance of the intent of this resolution. The sessions of said select committee to be held at the city of Albany, and report thereon to be made to this Assembly within ten days, unless otherwise ordered.

Said resolution giving rise to debate,

Ordered, That the same be laid on the table.

Mr. O'Hare called from the table a resolution previously offered by him in the words following:

Whereas, Widespread distrust and universal dissatisfaction prevail in the public mind, caused by the laxity and incompleteness of past legislation upon the subject of life insurance, and by the gross frauds and mismanagement which have brought many of the life insurance companies of the State of New York to the verge of insolvency, if not to utter bankruptcy; and,

Whereas, Ruin and desolation have been entailed upon many once happy homes, by the calamitous failures of life insurance companies, formerly considered bulwarks of strength and solvency; and,

Whereas, In addition to a thorough, sweeping and radical investigation of life insurance matters, through the instrumentality of a commission appointed by law, it is imperatively necessary that some steps should be taken towards the immediate enactment of such laws as will remedy the evils already known to exist therein; therefore,

Resolved, That the committee on insurance, of this House, be and it hereby is directed, within fifteen days, to prepare and report a general bill which shall contain such provisions and create such penalties and sanctions, both civil and criminal, as will effectually check the evils from which the community is now suffering, and prevent a recurrence of the disasters that have made them generally felt and recognized.

Mr. O'Hare moved to amend by striking out the words "within fifteen days," and insert in lieu thereof the words "on Friday next."

Mr. Purdy offered the following as a substitute:

Whereas, The State Superintendent of Insurance in his communication to the Senate, under date of February 21, reported that the following insurance companies, namely, the Equitable Life Assurance Company, the Globe Mutual Life Insurance Company, the Knickerbocker Life Insurance Company, the Metropolitan Life Insurance Company, the Mutual Life Insurance Company, the New York Life Insurance Company, the World Mutual Life Insurance Company, have not answered the resolution of the Senate, passed January 16, 1877, calling for a detailed statement, showing the amount paid in salaries, fees, compensation or donations to their respective presidents, vice-presidents, secretaries, medical examiners, attorneys, counselors and other employees for the year 1876; therefore,

Resolved, That the insurance committee of this House be requested to summon the president, vice-president, secretary and actuary of each of the aforesaid companies, and require a statement under oath as to each of the questions propounded in the resolutions of the Senate.

Mr. O'Hare accepted the substitute for the original resolution and amendment.

Mr. Weiant moved to amend by adding at the end of said resolution the following:

Resolved, That the committee on insurance be required to report to this House, for its consideration, a bill covering the more important defects in the present insurance laws relating to life insurance companies, on or before the 16th day of March, inst.

Mr. Strahan moved to amend by adding at the end of the resolution offered by Mr. Weiant, the following: And be it further

Resolved, That the insurance committee of this House be required to summon the president, vice-president, secretary and actuary of the Equitable Life Assurance Company, the Globe Mutual Life Insurance Company, the Knickerbocker Life Insurance Company, the Metropolitan Life Insurance Company, the Mutual Life Insurance Company, the New York Life Insurance Company and the World Mutual Life Insurance Company, and require a statement, under oath, from each of them, as to the amount paid in salaries, fees, compensation or donations to their respective presidents, vice-presidents, secretaries, medical examiners, attorneys, counselors, and other employees, for the year 1876, and report the result of such examination to this House within ten days.

Mr. Speaker put the question whether the House would agree to said amendment of Mr. Strahan, and it was determined in the affirmative.

The private secretary of his Excellency the Governor, appeared in the Assembly Chamber, and presented a communication in the words following :

STATE OF NEW YORK — EXECUTIVE CHAMBER,)
ALBANY, *March* 19, 1877. }

To the Assembly :

I return, without approval, Assembly bill No. 27, entitled "An act for the relief of certain persons claiming to have acted as clerks and assistant clerks of the district courts in the city of New York."

In January, 1876, the justices of several of the district courts in the

city of New York, removed the clerks of their respective courts, and appointed others in their places. The power to make such removals and appointments was denied by the former incumbents, and judicial proceedings were at once taken, which finally resulted in judgments by the Court of Appeals, to the effect that the removals were illegal, that the clerks who had been removed were entitled to the offices and to the salaries provided therefor. In pursuance of these judgments the salaries have been paid, and the legal liability of the city has been fully discharged. The bill under consideration peremptorily requires the financial officers of the city also to pay the clerks, who were unlawfully appointed, for their services during the pendency of the litigation instituted to test the validity of their appointment. On behalf of the city, objections are made to the bill which seem to me insurmountable.

Article 8, section 11 of the Constitution, provides that: "No county, city, town or village shall hereafter give any money or property, or loan its money or credit to or in aid of any individual, association or corporation." This bill requires the city of New York to give its money to private individuals who have not, and do not claim to have any legal right to it. If they had any such right, they could, of course, enforce it in the courts, and would not be before the Legislature asking it to compel the city to make this gift. The bill is, therefore, in direct conflict with the constitutional provision above cited.

It is claimed that there are equities in favor of the men who were the *de facto* clerks during the litigation, and that it will be a hardship for them to lose their pay. If this were true, the answer to it is that the Constitution makes no provision for such hardships. It does not, however, appear to be true to the extent claimed. These men knew from the beginning that their title to the office was disputed, and during every day of their service they knew that they were trying an experiment, and were liable to be defeated, as all other parties are who are engaged in litigation. They were under no obligation to accept the appointments, nor to hold the offices for a day. They might have resigned at any time. They chose voluntarily to accept the offices and to take the risk of the litigation in which their choice involved them. It is too much for them now to ask that they shall be relieved from the risk they took, and that the city shall be treated as an insurer of their success in the litigation and be compelled to pay their losses. It would be contrary to established principles of law and against public policy. It would furnish a bad precedent and encourage usurpation of office and future litigation.

There are other provisions of the Constitution which seem to be infringed in spirit, if not in letter, by this bill. Section 9, article 1, is as follows: "The assent of two-thirds of the members elected to each branch of the Legislature shall be requisite to every bill appropriating the public moneys or property for local or private purposes." This bill was passed by a majority and not by two-thirds of the members of each house. It is said, in answer to this objection, that the term "public moneys" should be construed to mean moneys in the State treasury. There is nothing in the Constitution which indicates that the meaning of the term should be thus limited, and certainly no reason can be given for holding that the moneys in the city treasury are not, in every respect, as much public moneys as those in the State treasury.

Section 24 of article 3 is: "The Legislature shall not, nor shall the common council of any city, nor any board of supervisors, grant any

extra compensation to any public officer, servant, agent or contractor." It is not claimed that this section applies specifically to the provisions of the bill under consideration; but it does illustrate the spirit of the fundamental law and the sedulous care with which it guards the public moneys, both of State and cities, from appropriation to persons to whom there is no legal liability. It will be of evil example if, at a time when every possible effort is demanded to reduce the load of local taxation, the city of New York is forced to pay double salaries for one service. The State cannot afford to be unjust to the people in their aggregate any more than in their individual capacity.

Ordered, That the Clerk deliver said bills to the Governor.

The private secretary appeared in the Assembly chamber and presented a communication from his excellency the Governor, in words following:

STATE OF NEW YORK — EXECUTIVE CHAMBER, {
ALBANY, *March 26, 1877.* }

To the Assembly:

I return without my approval Assembly bill No. 85, entitled "An act in relation to the Superintendent of Public Works."

The frauds and crimes in canal management brought to light within the last two years, are well known. They imposed impressive burdens alike upon tax-payers and the boatmen who navigate the canals. If they had not been arrested they would have covered the State with disgrace and brought the canals to ruin.

At the last election the people, by a majority of 451,321 adopted an amendment to the Constitution establishing an entirely new system of canal administration. It provides for the appointment by the Governor, by and with the advice and consent of the Senate, of one Superintendent of Public Works, who is to hold his office during the term of the Governor by whom he is nominated, and by whom he may be suspended or removed at any time, without any action by the Senate. The Governor himself is thus made responsible to the people of the State for the faithful performance of the duties of the Superintendent, whom he is bound to watch over and hold to a rigid accountability. The object of this provision is to hold the Executive head of the State responsible for any further mismanagement of the canals. The Superintendent is "charged with the execution of all laws relating to the repairs and navigation of the canals." "Subject to the control of the Legislature, he shall make the rules and regulations for the navigation or use of the canals." He is to appoint not more than three assistants, who are to be subject to suspension or removal by him. "All other persons employed in the care and management of the canals, except collectors of tolls and those in the department of the State Engineer and Surveyor, shall be appointed by the Superintendent of Public Works, and be subject to suspension or removal by him. The office of Canal Commissioner is abolished from and after the appointment and qualification of the Superintendent of Public Works, until which time the Canal Commissioners shall continue to discharge the duties as now provided by law."

It must be apparent to every one that if the Superintendent was to have any chance of success in organizing this new system, preparing his plans and regulations, selecting his assistants and employes, repairing canals, and getting them ready for navigation at the usual time, it was vitally important that he should be appointed and enter upon the wide field of his duties at the earliest practicable day. Under the amendment, he might have been appointed at any time, but he could not enter upon the duties of his office until he had given the security to be required by law.

In my annual message, communicated to the Legislature on the second day of January last, I called special attention to this subject, and earnestly urged the immediate passage of an act fixing the salary and the amount of security to be given, so that the Superintendent might be appointed and enter at once upon his work, leaving any further legislation that might be found desirable to be perfected at the convenience of the Legislature. This recommendation was disregarded. No bill was introduced until the twenty-second of January, and the one then introduced, as subsequently amended, was encumbered with many useless provisions, calculated to provoke protracted discussion and delay.

It was not until the sixteenth day of March, at the close of the eleventh week of the session, the bill came into the Executive Chamber. Careful consideration had already been given to the selection of a candidate most likely to be acceptable, one who would best meet all the requirements of the position, and for whose management of the canals the Governor might safely hold himself responsible to the people. Realizing the necessity of immediate action, within half an hour after the receipt of the bill I nominated to the Senate a gentleman known and honored throughout the State and Nation, a graduate of our National Military Academy, of distinguished ability as an engineer, and in the organization and discipline of men, and whose personal purity of char-

acter was universally acknowledged. Having no entangling alliances with any canal combinations or party factions, it was believed that he was well fitted for the task of lifting the canal administration out of the difficulties into which it had fallen under the old system, and of placing it upon a higher plane. It was also believed that no man could be in more perfect accord with the spirit of that portion of section nine of the bill under consideration, which declares that "no appointment shall be made for partisan purposes or by reason of political opinions." The nomination was made on the sixteenth of March. It lay in the Senate until the twenty-second of March, when it was taken up and rejected by a strict party vote, in obedience to a determination of a party caucus, as was stated in open executive session upon the floor of the Senate. In the same manner, at the same time, and under the same caucus determination, the nominations of most competent and respectable gentlemen for Superintendent of the Banking Department, Health Officer, Port Warden and Captain of the Port, being all the executive nominations before the Senate for important positions, were rejected.

This action could only be understood as a distinct notice to the Governor that no nomination he might make would be confirmed, unless made in obedience to the choice of the same party caucus. But even if this construction is not warranted, the rules of the Senate recently adopted by the same party majority, will prevent another nomination, unless by unanimous consent, before the first Wednesday in April, and defer action upon it until the third Wednesday in April. Only thirty working days remain between this and the first of May. Within that time the appointments must be made, the repairs on the canals completed, and navigation opened. If an appointment could be made at once, there would be no hope and no possibility that a Superintendent could organize and put into operation the new system provided by the constitutional amendment. The Canal Commissioners foreseeing the fatal result of these delays, have deemed it their duty to proceed, and are proceeding with the work of preparing the canals for opening. It is scarcely necessary to add that any attempt to substitute the new system for the old, after operations have commenced under the latter, would be wholly impracticable. The long delays in passing the act and the action of the Senate since its passage have effectually destroyed the system so far as the approaching season is concerned. No possible alternative is left for opening the canals, except by the action of the Canal Commissioners under the old system, and in accordance with existing statutes.

The question then arises, what will be the effect of the bill under consideration if it shall become a law. Section eight of the bill provides that "the offices of the Superintendent of Canal Repairs and of division, resident and assistant engineers on the line of the canals are hereby abolished." If, therefore, the bill be approved, the entire machinery by which the Commissioners are required to carry on their work will be destroyed. All work upon the canals must at once cease. They can neither be repaired, opened or navigated.

Even if a Superintendent of Public Works was appointed as contemplated by the bill, he would be seriously embarrassed by the cutting off at once of the entire engineering department of the canals. The work done through that department during the last year has been of great importance to the State, whilst the expenses have been largely reduced. The estimates for the current year show a further reduction to an amount believed to be much below what the cost would be under the

plan proposed in the bill. It would be a hazardous experiment and poor economy for the first Superintendent of Public Works to undertake to carry on the operations of the canals without any assistance whatever from the engineering department upon which he must rely for accurate information.

Moreover, this bill makes no provision for the care and custody of the records and papers of these offices. The breaking up of that department and the removal of these records from their appropriate places of deposit, would put them in danger of being lost or stolen, in which case the State would be deprived of most important evidence in the trial of actions against parties charged with fraud and misconduct in regard to canal operations.

For the reasons herein stated, and as the only means now left for opening the canals at all, I am constrained to withhold my approval from this bill.

L. ROBINSON.

§ 2. The said commissioner of street cleaning is hereby invested with full and exclusive power and authority, and is hereby charged with the duty of causing all the streets, avenues, lanes, alleys, gutters, wharves, piers and heads of slips in said city, to be well and thoroughly cleaned, and kept at all times thoroughly cleaned, and to remove immediately all dirt and sweepings therefrom, and to remove daily all ashes, garbage, rubbish, dirt and sweepings of every kind from all dwellings, stores, public buildings and institutions, and to remove the snow and ice from the principal thoroughfares in said city. The said ashes, garbage, dirt, rubbish and sweepings shall be removed from the city as fast as collected, except such dirt and ashes as may, in the opinion of the commissioner, with the approval of the board of health, be suitable for filling in low grounds or sunken lots.

§ 3. The said commissioner of street cleaning is hereby authorized to appoint such clerks, officers, employes and laborers as may be necessary in executing the several provisions of this act. The compensation of the commissioner of street cleaning, and of the several clerks, officers, employes and laborers in his department, shall be fixed by the board of estimate and apportionment.

§ 4. All the buildings, docks, dumping-boards, boats, working stock and implements now in the possession of the board of police, and used for street cleaning purposes, are hereby transferred to the said commissioner of street cleaning, and the said board of police is hereby directed to deliver the same to him for his use in the performance of said work.

§ 5. The said commissioner of street cleaning is hereby invested with power to purchase all horses, carts, machines, scows, boats or other implements that may be necessary, in addition to all the several kinds now being used on the work by the board of police, or to hire the same, as he may deem most desirable and economical, or to hire or purchase any other implements, materials or things necessary for the said commissioner to perform thoroughly and efficiently all the duties imposed by this act.

§ 6. The dock department, as it may, from time to time, be constituted, shall provide and set apart for the use of said commissioner of street cleaning, sufficient docks and dumping-boards, suitable in all respects to the requirements of the work of street cleaning, and at locations convenient for the economical performance of the same, and to enable the said commissioner to perform the duties imposed by this act.

The private secretary of his Excellency the Governor appeared in the Assembly Chamber and presented a message in the words following:

STATE OF NEW YORK — EXECUTIVE CHAMBER, {
ALBANY, *April 5, 1877.* }

To the Assembly:

I return, without approval, Assembly bill No. 47, entitled "An act to amend chapter 617 of the Laws of 1873, entitled 'An act regulating the deposit of securities by plate-glass insurance companies.'"

The present statute requires a deposit of \$50,000 of securities with the Superintendent of the Insurance Department by every plate-glass insurance company, as a condition precedent to the transaction of any business. The deposit is by law intended to, and does furnish a part of the security of the policyholders. All the companies of this class, now doing business in the State, have complied with this provision. Their securities are in the Insurance Department. The effect of the bill under consideration is to allow them to withdraw one-half of the securities and continue business upon a deposit of \$25,000 only.

Many policies have been issued under the law as it now stands, and the value of each one is affected by this bill. The security of the policyholders is lessened if it becomes a law. The statutes of the State assured them, when they took out their policies, that \$50,000 was held by the Insurance Department as a guarantee of the solvency of the company. Upon that guaranty the insured relied, and had a right to rely. To diminish that guaranty by half would be injustice to the policyholders and bad faith on the part of the State. Sound policy, at present, demands added and not lessened security from insurance companies, and the present provision of the law is by no means too stringent.

For these reasons I am compelled to withhold my signature from the bill.

L. ROBINSON.

On motion of Mr. Webb, and by unanimous consent, said message was laid on the table and ordered printed.

Mr. Smith, from said committee, also reported in favor of the passage of said second mentioned bill, with amendments, the title amended by inserting after the word "four" the words "article first," and after the word "part" the word "one;" which report was agreed to, and said bill ordered engrossed for a third reading.

Section 1, line 1, after the word "Suffolk" insert the words "except the town of Islip." Same line, strike out the word "Tioga." Line 2, after the word "Saratoga" insert the words "except the town of Saratoga Springs." Same line, strike out the word "Erie." Line 3, after the word "Otsego" insert the words "Schoharie, Niagara and Orleans." Lines 9 and 10, strike out the words "passed April 29, 1875."

Amend the title so as to read "An act to exempt the counties of Suffolk (except the town of Islip), Onondaga, Saratoga (except the town of Saratoga Springs), Ontario, Yates, Rensselaer, Genesee, Schenectady, Monroe, Livingston, Otsego, Schoharie, Niagara and Orleans from the provisions and operation of chapter 180 of the Laws of 1875, entitled 'An act creating the board of town auditors in the several towns of this State, and to prescribe their powers and duties.'"

Mr. Stein offered for the consideration of the House a resolution, in the words following:

Whereas, The Governor of the State in his annual message to the Legislature, having informed this House that in some respects the government of the city of New York is almost in a chaotic condition; and it being publicly announced in the New York press of the third inst., that the Chief Justice of the Court of Appeals has declared, that owing to the confusion existing in the laws relating to the city of New York, it is impossible for the highest court in the State to determine what is, or is not law in relation to that city; and the bill now on the files of the members, known as Senate bill No. 231, being calculated, from its provisions, to carry still greater confusion into the government of the

city than what even now exists, owing to the several clauses therein, which transfer powers and duties without defining what those powers and duties are; and in view of the probable action of the Legislature in passing the proposed constitutional amendments in reference to the government of cities, and the desirability, before those amendments are submitted to the people for their action thereon, that the present confused and inconsistent system of law which relates to the city of New York, should be amended and consolidated, and in this amendment and consolidation all needful and proper reform should be incorporated and made part of a completed system for the government of the city of New York; therefore,

Resolved, That all bills now before this House, which relate to the government of the city of New York, be committed to the committee on affairs of cities of this House, and that said committee is hereby directed to report, within ten days, the best plan which, in the judgment of said committee, is calculated to become a proper amendment and consolidation of the laws of said city, incorporating all necessary reforms, and until such report is received, no action shall be taken by this House upon any of the bills reported relative to the local government of the city of New York.

Said resolution giving rise to debate,

Ordered, That the same be laid on the table.

Resolved, That a respectful message be sent to the honorable the Senate asking them to return bill No. 306, entitled "An act authorizing and empowering the common council of the city of Rochester to construct a turn-table or swing-bridge over the Erie canal, in Allen street, in the city of Rochester."

Mr. Speaker put the question whether the House would agree to said resolution, and it was determined in the affirmative.

Ordered, That the Clerk deliver said resolution to the Senate, and request their concurrence therein.

Mr. Hayes offered for the consideration of the House a resolution, in the words following:

Whereas, Successful armed resistance to Spanish authority in the Island of Cuba has been maintained during the past eight years, by a people who have organized a government, republican in form, which guarantees to all its citizens freedom of person in religion, the right to acquire and enjoy property, the pursuit of happiness, and to participate in its affairs; and,

Whereas, The Republic of Cuba has maintained its power until its authority is now recognized over more than half of the territory of that island, and the attention of the whole civilized world is being directed to it; and,

Whereas, It is the duty of the Government of the United States, as the great republic of the world, as the hope and pride of oppressed humanity everywhere, to extend its sympathies to all people who are struggling against oppression and endeavoring to secure for themselves and their posterity the blessings of freedom and of free government; and,

Whereas, An extraordinary war tax of thirty per cent is imposed on all products of that island imported into this country, which, during the past eight years, has averaged annually \$85,000,000 in value, while our exports to the same island have averaged only \$16,000,000, thus

•

forcing the American people to become the principal contributors to the support of a war alike injurious to their interests and offensive to the public sense of patriotism, justice and the civilization of the age; and,

Whereas, The commander of the Spanish forces on said island has recently issued an order declaring that no quarter or mercy will be shown to those who persist in their opposition to Spanish authority on that island after the first day of May next, thereby indicating that the barbarism of past ages is to be repeated in war, in violation of the conscience and expressed judgment of all civilized governments of this age; therefore, be it

Resolved (if the Senate concur), That in the opinion of this Legislature, the time has arrived when it becomes the duty of the Government of the United States to take such action as is best calculated to terminate the war now being waged on the Island of Cuba, and in so doing it should shape its policy in such a manner as to give encouragement to the people of that island, who are struggling to establish a free government.

Resolved (if the Senate concur), That our Senators and Representatives in Congress be requested to aid in bringing about these results.

Said resolutions being concurrent,

Ordered, That the same be laid on the table.

Mr. Hogeboom offered for the consideration of the House a resolution, in the words following:

Resolved (if the Senate concur), While desirous of referring the question of the recognition of the revolutionary government of Cuba to the appropriate federal authorities at Washington, we cannot, at this time, refrain from expressing our profound regret at the information received that the commander of the Spanish forces on the Island of Cuba has recently issued an order declaring "that no quarter or mercy will be shown to those who persist in their opposition to Spanish authority on that island after the first day of May next," and regarding said order as contrary to the enlightened spirit of the present age, and a return to the barbarism of the past, we call upon the President to cause inquiry to be made as to the facts really existing, and, if found to be as stated, in behalf of one of the family of nations, to enter an earnest protest against the outrage on the rights of humanity recognized in the moral code of the civilized world; and we ask our representatives in Congress to further the purpose of these resolutions.

Said resolution being concurrent,

Ordered, That the same be laid on the table.

Mr. Tighe called from the table a resolution previously offered by him, in the words following:

Whereas, Charges have been and are made that the provisions of the act entitled "An act to provide for the licensing and government of the pilots and regulating the pilotage of the port of New York, passed June 28, 1853, and the acts amendatory thereof," have been and are being violated and disregarded by the commissioners appointed thereunder; that taxes and assessments not provided for by law are made, assessed and levied upon the pilots with the knowledge and consent of the commissioners, and that no report is ever made to the people of the proceedings had by said commissioners or of the amounts of moneys collected by them under the provisions of the law or otherwise; and,

Whereas, The provisions of said act above recited and the acts amendatory thereof do not, in any manner, provide for the making of any report by the pilot commissioners of their proceedings; and,

Whereas, It is important that the people should have full information of all proceedings had by the said pilot commissioners and of all their acts as such commissioners; therefore, be it

Resolved, That the committee on commerce and navigation be directed to inquire and examine into all the proceedings and actions of the pilot commissioners appointed under the provisions of the act passed June 28, 1853, and of the acts amendatory thereof; that they ascertain the amount of moneys collected from pilots and others by said commissioners, or by any other person or persons, and the disposition made thereof, as well as the amount of money taxed, assessed and levied upon the pilots by said commissioners, or by any other person or persons with their knowledge and consent, and that for the purpose of such investigation it is further resolved that said committee shall have power to send for persons and papers, etc.

Mr. Strahan moved that said resolution be laid on the table.

Gentlemen of the Massachusetts Legislature:

In behalf of the Assembly of the State of New York, it becomes my agreeable duty, as its presiding officer, to extend to you a cordial welcome to this chamber.

Understanding your mission to be purely one of business, having reference to more extended railway facilities between the two great commonwealths respectively represented on this occasion, by which it is believed that the interests of Massachusetts may become more closely identified with those of New York, we say to you that we wish you all success in your undertaking.

It is a hopeful sign amid the depression prevailing at the present time in all departments of industry, that Massachusetts, perceiving with prophetic ken the signs of returning life and vigor, is moving in the direction of new and important public enterprises, as she was the first to send her sons to the front when the cloud of war hung menacingly over the nation. So it would appear that she also leads again in coming out from the darkness of commercial gloom, too long impending, and by which growth has been paralyzed and the development of the country held in check. It gives me pleasure to assure you that it is the wish of every member of this House that your visit to our State may eventuate in the most agreeable recollections, and at the same time beneficent and satisfactory results.

Again, gentlemen of the Massachusetts Legislature, in behalf of the body over which I have the honor of presiding, I welcome you to the capital of the State of New York, and I assure you of our desire that your visit may be in all respects enjoyable and in all respects beneficial.

A message from the Senate was received and read, requesting the concurrence of the Assembly to the bill entitled as follows:

The private secretary of his Excellency the Governor, appeared in the Assembly Chamber, and presented two messages in the words following:

STATE OF NEW YORK — EXECUTIVE CHAMBER, }
ALBANY, *April* 12, 1877.

To the Assembly:

I return, without approval, bill No. 86, entitled "An act to provide for the construction of fishways in the State dams across the Oswego, Oneida and Seneca rivers.

Since the appointment of the commissioners of fisheries in 1868, the Legislature has appropriated over \$100,000 for replenishing the lakes and rivers of this State with fish. I understand there is an appropriation of \$15,000 more in the supply bill of this year for the same purpose. With the appropriation of \$7,000 proposed by this bill, it will make \$22,000 for the present year. There can be no pressing necessity to warrant such an expenditure in the present condition of affairs. It cannot be done consistently with any claim to economy in the appropriation of public moneys. Moreover, if the work is to be done upon the dams constructed for canal purposes, it should be paid for from the canal fund and not by direct taxation. It is well known that the canal revenues are already inadequate to meet the demands upon them.

L. ROBINSON.

Mr. Baker moved to lay said message with the bill on the table.

Mr. Speaker put the question whether the House would agree to said motion, and it was determined in the affirmative.

STATE OF NEW YORK — EXECUTIVE CHAMBER, }
ALBANY, *April* 12, 1877.

To the Assembly:

I return, without my approval, bill No. 72, entitled "An act in relation to collectors and receivers of taxes."

This bill makes it the duty of collectors and receivers of taxes in the towns of this State to receive at par in payment of town, county and State taxes, orders issued by the board of supervisors upon the treasurer of the county in which said towns are located, providing said orders shall have been issued in due conformity with law.

This bill is probably the outgrowth of a custom prevailing in many parts of the State, by which the collectors receive these orders in payment of taxes where they know them to be correct. They are, of course, at liberty to refuse any order whenever they see fit to do so, and to demand current money. The present act, however, makes these orders a legal tender for taxes. The collector must receive them if they are legally issued.

The embarrassment and injustice of requiring tax collectors to pass on the validity of supervisors' orders must be apparent to every one. The certainty of frequent errors is equally manifest. In the very probable event of a collector's accepting an illegal order or refusing a valid one, serious questions would at once arise involving the respective liability of the tax-payer, the collector and his bondsmen. It is doubtful if collectors in large towns could procure sureties were this bill to become law. Annoying litigations would be its certain and speedy result. Nor would the bill afford any substantial relief. These orders are seldom presented by those to whom they are issued, but are bought up at a discount by those who are able to hold them until they are paid. The benefit arising from the act will, therefore, be conferred upon those

who least need it — the purchasers of those orders. To elevate them to the rank of legal tenders would open the door to fraud and error, besides starting vexing questions of benefit to no one and positively detrimental to the public interest.

L. ROBINSON.

Mr. Williams moved that the message with the bill be laid on the table.

Mr. Speaker put the question whether the House would agree to said motion, and it was determined in the affirmative.

Mr. Speaker announced the special order of the day, being the bill entitled "An act to provide for the better protection of policyholders of life insurance policies."

The House then resolved itself into a committee of the whole on the bill entitled as follows:

"An act to provide for the better protection of policyholders of life insurance companies."

And after some time spent therein, Mr. Speaker resumed the chair, and Mr. Davenport, from said committee, reported progress on said bill, and asked and obtained leave to sit again.

Mr. Husted moved that said bill be committed to a select committee of 15, to consist of the insurance committee and six to be appointed by the Speaker, said committee to report back to the House said bill complete, retaining its place on general orders.

Mr. Fish moved to amend by striking out "15" and inserting "21," to consist of the insurance committee and twelve to be appointed by the Speaker, said committee to report said bill back to the House in one week complete, with amendments adopted in committee of the whole, the same retaining its place on general orders.

Mr. Strahan moved the previous question.

Mr. Speaker put the question, "Shall the main question be now put?" and it was determined in the affirmative.

Mr. Speaker then put the question whether the House would agree to said motion of Mr. Fish, and it was determined in the negative.

Mr. Speaker then put the question whether the House would agree to aid motion of Mr. Husted, and it was determined in the affirmative.
